Department of the Treasury
Internal Revenue Service

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenue at the least cost; serve the public by continually improving the quality of our prod-

ucts and services; and perform in a manner warranting the highest degree of public confidence in our integrity, efficiency, and fairness.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents of a permanent nature are consolidated semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and proce-

dures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

Part I.—1986 Code.

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1986.

Part II.—Treaties and Tax Legislation.

This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.

To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts. Also included in this part are Bank Secrecy Act Administrative Rulings. Bank Secrecy Act Administrative Rulings are issued by the Department of the Treasury's Office of the Assistant Secretary (Enforcement).

Part IV.—Items of General Interest.

With the exception of the Notice of Proposed Rulemaking and the disbarment and suspension list included in this part, none of these announcements are consolidated in the Cumulative Bulletins.

The first Bulletin for each month includes a cumulative index for the matters published during the preceding months. These monthly indexes are cumulated on a semiannual basis and are published in the first Bulletin of the succeeding semiannual period, respectively.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

.03 IRS/MCC does not process Forms W-2. Paper **and/or** magnetic media for Forms W-2 must be sent to SSA. IRS/MCC does, however, process waiver requests (Form 8508), extension of time to file requests (Form 8809) for Forms W-2 and requests for extension of time to provide the employee copies of Forms W-2.

.04 Generally, the box numbers on the paper forms correspond with the amount codes used to file magnetically/electronically; however, if discrepancies occur, the instructions in this revenue procedure govern.

.05 This revenue procedure also provides the requirements and specifications for magnetic media or electronic filing under the Combined Federal/State Filing Program.

.06 The following revenue procedures and publications provide more detailed filing procedures for certain other information returns.

- (a) 1998 "Instructions for Forms 1099, 1098, 5498, and W-2G" provides specific instructions on completing and submitting information returns to IRS.

- .08 Refer to Part A, Sec. 17, for definitions of terms used in this publication.

Sec. 2. Nature of Changes—Current Year (Tax Year 1998)

.01 Legislative changes for Tax Year 1998 necessitated major changes in the record format for information returns filed magnetically/electronically. There are two new forms for Tax Year 1998, the Form 1098-E, Student Loan Interest Statement, and Form 1098-T, Tuition Payments Statement. However, for Tax Year 1998, Form 1098-T is not required to be reported magnetically. Additional fields have been added to some of the existing records. IRS/MCC has redesigned the record layouts and expanded record lengths from 420 positions to 750 positions for the Payer "A" Record, the Payee "B" Record, the End of Payer "C" Record, the State Totals "K" Record, and the End of Transmission "F" Record. In addition, a Transmitter "T" Record has been added as the first record on the file. This record will contain transmitter information from the Form 4804, Transmittal of Information Returns Reported Magnetically/Electronically. The record changes make it imperative for filers to read this publication in its entirety. Failure to comply with the new record formats will result in the media being returned to the filer.

.02 In previous years, new or revised information in the publication has been highlighted by the use of italics. Due to the complete change in record formats, italics will not be used in this publication. Filers are encouraged to read the entire publication.

.03 Within the next few years, IRS/MCC will discontinue processing 5 ¼-inch diskettes as an acceptable form of media. Filers are encouraged to explore optional types of media or methods for submitting information returns to IRS/MCC. The Information Reporting Program-Bulletin Board System (IRP-BBS) is a highly recommended alternative to diskette filing.

Hours of operation for the Call Site are Monday through Friday, 8:30 a.m. to 4:30 p.m. Eastern Time. The Call Site is in operation throughout the year to handle the questions of payers, transmitters, and employers. Due to the high demand for assistance at the end of January and February, it is advisable to call as soon as possible to avoid these peak filing seasons.

Sec. 4. Filing Requirements

.01 The regulations under section 6011(e)(2)(A) of the Internal Revenue Code provide that, any person, including a corporation, partnership, individual, estate, and trust, who is required to file 250 or more information returns must file such returns magnetically/electronically. **The 250* or more requirement applies separately for each type of return and also to each type of corrected return.**

***Even though as many as 249 information returns may be submitted on paper to the Internal Revenue Service, IRS encourages filers to transmit information returns magnetically or electronically.**

.02 All filing requirements that follow apply individually to each reporting entity as defined by its separate Taxpayer Identification Number (TIN) [Social Security Number (SSN), Employer Identification Number (EIN), Individual Taxpayer Identification Number (ITIN), or Adoption Taxpayer Identification Number (ATIN)]. For example, if a corporation with several branches or locations uses the same EIN, the corporation must aggregate the total volume of returns to be filed for that EIN and apply the filing requirements to each type of return accordingly.

.03 Payers who are required to submit their information returns on magnetic media may choose to submit their documents by electronic filing. Payers who submit their information returns electronically are considered to have satisfied the magnetic media filing requirements.

.04 IRS/MCC has two methods by which payers may submit their files electronically. Bisynchronous (mainframe) electronic filing, which can be found in Part C of this publication, or Asynchronous (Information Reporting Program-Bulletin Board System), which is in Part D. An overview of some features provided on the IRP-BBS are as follows:

- Electronic filing of information returns to the IRS using dial-up modems
- Return notification of the acceptability of the data transmitted within 24 to 48 hours
- Electronic communication with IRS and SSA bulletin board systems
- Access to shareware
- Access to forms and publications relating to the Information Reporting Program
- News about the latest changes and updates that affect the Information Reporting Program at IRS
- Answers to messages and questions left on the bulletin board
- Available for public use and can be reached by dialing 304-264-7070
- IRP-BBS is accessible 24 hours a day, 7 days a week. Routine maintenance is performed daily, at approximately 7:00 a.m. Eastern Time.
- Questions, comments, or suggestions can be directed to the Systems Operator (SYSOP) through IRP-BBS.

.05 The following requirements apply separately to both originals and corrections filed magnetically/electronically:

1098	250 or more of any of these forms require magnetic media or electronic filing with IRS. These are stand alone
1098-E	alone documents and are not to be aggregated for purposes of determining the 250 threshold. For
1098-T*	example, if you must file 100 Forms 1099-B and 300 Forms 1099-INT, Forms 1099-B need not be filed
1099-A	magnetically or electronically since they do not meet the threshold of 250. However, Forms 1099-INT must be
1099-B	filed magnetically or electronically since they meet the threshold of 250.
1099-C	
1099-DIV	
1099-G	
1099-INT	
1099-LTC	
1099-MISC	
1099-MSA	
1099-OID	
1099-PATR	
1099-R	
1099-S	
5498	
5498-MSA	
W-2G	

*For Tax Year 1998, Form 1098-T may be reported on paper regardless of the 250 threshold.

.06 The above requirements do not apply if the payer establishes hardship (see Part A, Sec. 5).

Sec. 5. Form 8508, Request for Waiver From Filing Information Returns on Magnetic Media

.01 If a payer is required to file on magnetic media but fails to do so (or fails to file electronically, in lieu of magnetic media filing) and does not have an approved waiver on record, the payer will be subject to a penalty of \$50 per return in excess of 250. (For penalty information, refer to the Penalty section of the 1998 "Instructions for Forms 1099, 1098, 5498, and W-2G.")

.02 If payers are required to file original or corrected returns on magnetic media, but such filing would create a hardship, they may request a waiver from these filing requirements by submitting Form 8508, Request for Waiver From Filing Information Returns on Magnetic Media, to IRS/MCC.

.03 Even though a payer may submit as many as 249 corrections on paper, IRS encourages magnetically or electronically submitted corrections. Once the 250 threshold has been met, filers are required to submit any returns of 250 or more magnetically or electronically. However, if a waiver for original documents is approved, any corrections for the same type of returns will be covered under this waiver.

.04 Generally, only the payer may sign the Form 8508. A transmitter may sign if given power of attorney; however, a letter signed by the payer stating this fact must be attached to the Form 8508.

.05 A transmitter must submit a separate Form 8508 for each payer. Do not submit a list of payers.

.06 All information requested on the Form 8508 must be provided to IRS for the request to be processed.

.07 The waiver, if approved, will provide exemption from magnetic media filing for the current tax year only. Payers may not apply for a waiver for more than one tax year at a time; application must be made each year a waiver is necessary.

.08 Form 8508 may be photocopied or computer-generated as long as it contains all the information requested on the original form.

.09 Filers are encouraged to submit Form 8508 to IRS/MCC at least 45 days before the due date of the returns.

.10 **File Form 8508 for the W-2 series of forms with IRS/MCC, not SSA.**

.11 Waivers are evaluated on a case-by-case basis and are approved or denied based on criteria set forth in the regulations under section 6011(e) of the Internal Revenue Code. The transmitter must allow a minimum of 30 days for IRS/MCC to respond to a waiver request.

.12 If a waiver request is approved, the transmitter should keep the approval letter on file. **The transmitter should not send a copy of the approved waiver to the service center where the paper returns are filed.**

.13 **An approved waiver from filing information returns on magnetic media does not provide exemption from all filing.** The payer must timely file information returns on acceptable paper forms with the appropriate service center.

.14 **Desert Storm/Operation Joint Guard (OJG) [See Note] (Bosnia Region) Contributions** - If a payer is required to file a Form 5498 magnetically/electronically, the payer may request an **automatic** waiver to file Forms 5498 on paper for participants of Desert Storm or Operation Joint Guard. The payer should clearly mark Desert Storm or Operation Joint Guard on the waiver request form.

☛ **Note: Military personnel under Operation Joint Guard (OJG) will be treated the same as military personnel under Operation Joint Endeavor (OJE) for purposes of Pub. L. 104-117 and Notice 96-34, 1996-1 C.B. 379.**

Sec. 6. Vendor List

.01 IRS/MCC prepares a list of vendors who support magnetic media or electronic filing. The Vendor List (Pub. 1582) contains the names of service bureaus that will produce files on the prescribed types of magnetic media or via electronic filing. It also contains the names of vendors who provide software packages for payers who wish to produce magnetic media or electronic files on their own computer systems. This list is compiled as a courtesy and in no way implies IRS/MCC approval or endorsement.

.02 **If filers meeting the filing requirements engage a service bureau to prepare media on their behalf, the filers should be careful not to report duplicate data, which may cause penalty notices to be generated.**

.03 The Vendor List may be updated in print every other year. The most recently printed copy will be available by contacting IRS/MCC at (304) 263-8700 or by way of a letter (see Part A, Sec. 3). The copy of the Vendor List on the Information Reporting Program-Bulletin Board System is updated whenever changes or new information is received (Refer to Part D).

.04 A vendor, who offers a software package, has the ability to produce magnetic media for customers, or has the capability to electronically file information returns, and would like to be included on the list, must submit a written request to IRS/MCC. The request should include:

- (a) Company name
- (b) Address (include city, state, and ZIP code)
- (c) Telephone number (include area code)
- (d) Contact person
- (e) Type(s) of service provided (e.g., service bureau and/or software)
- (f) Type(s) of media offered (e.g., magnetic tape or tape cartridge, 5 ¼- or 3 ½-inch diskettes, or electronic filing)
- (g) Type of return

Sec. 7. Form 4419, Application for Filing Information Returns Magnetically/Electronically

.01 Transmitters are required to submit Form 4419, Application for Filing Information Returns Magnetically/ Electronically, to request authorization to file information returns with IRS/MCC. A single Form 4419 should be filed no matter how many types of returns the transmitter will be submitting magnetically/ electronically. For example, if a transmitter plans to file Forms 1099-INT, one Form 4419 should be submitted. If, at a later date, another type of form (Forms 1098, 1099, 5498 and W-2G) is to be filed, the transmitter does not need to submit a new Form 4419.

EXCEPTIONS

An additional Form 4419 is required for filing each of the following types of returns: Forms 1042-S, 8027, and W-4.

FORM	TITLE	EXPLANATION
1042-S	Foreign Person's U.S. Source Income Subject to Withholding	Payments subject to withholding under Chapter 3 of the Code, including interest, dividends, royalties, pensions and annuities, gambling winnings and compensation for personal services.

Employer's Annual
Information Return
of Tip Income and
Allocated Tips

Receipts from operations where tipping is customary. Used by the employer to report employee's tips or allocated tips.

W-4
(See **Note**)

Employee's Withholding
Allowance Certificate

Forms received during the quarter from employees quarter from employees still employed at the end of the quarter who claim the following:
(a) More than 10 withholding allowances or
(b) Exempt status and wages normally would be more than \$200 a week.

➔ **Note: Employers are not required to send other Forms W-4 unless notified to do so by the IRS.**

.02 Magnetic tape, tape cartridge, diskette, and electronically-filed returns may not be submitted to IRS/MCC until the application has been approved. Please read the instructions on the back of Form 4419 carefully. A Form 4419 is included in the Publication 1220 for the filer's use. This form may be photocopied. Additional forms may be obtained by calling **1-800-TAX-FORM (1-800-829-3676)**. The form is also available on **IRP-BBS at 304-264-7070** or on **Internet at <http://www.irs.ustreas.gov>**.

.03 Upon approval, a five-character alpha/numeric Transmitter Control Code (TCC) will be assigned and included in an approval letter. The TCC **must** be coded in the Transmitter "T" Record. If a transmitter uses more than one TCC to file, each TCC must be reported on separate media or in separate transmissions if filing electronically.

.04 Annually, a Publication 1220 containing the current revenue procedure, forms, and instructions will be sent to the attention of the contact person indicated on Form 4419.

.05 If **any** of the information (name, TIN or address) on the Form 4419 changes, please notify IRS/MCC in writing so the IRS/MCC database can be updated. However, a change in the method by which information returns are being submitted is not information which needs to be updated (i.e., tape to disk, disk to BBS). The transmitter should include the TCC in all correspondence.

.06 Form 4419 can be submitted any time during the year; however, it **must** be submitted to IRS/MCC at least 30 days before the due date of the return(s) for current year processing. **For documents to be filed electronically using IBM 3780 bisynchronous protocols, Form 4419 must be submitted at least 45 days prior to the due date of the returns (See Part C, Sec. 2).** This will allow IRS/MCC the minimum amount of time necessary to process and respond to applications. In the event that computer equipment or software is not compatible with IRS/MCC, a waiver may be requested to file returns on paper documents.

.07 IRS/MCC encourages transmitters who file for multiple payers to submit one application and to use the assigned TCC for all payers.

.08 If a payer's files are prepared by a service bureau, the payer may not need to submit an application to obtain a TCC. Some service bureaus will produce files, code their own TCC on the media, and send it to IRS/MCC for the payer. Other service bureaus will prepare magnetic media and return the media to the payer for submission to IRS/MCC. These service bureaus may require the payer to obtain a TCC to be coded in the Transmitter "T" Record. Payers should contact their service bureaus for further information.

.09 Once a transmitter is approved to file magnetically or electronically, it is not necessary to reapply each year **unless:**

- (a) The payer has discontinued filing magnetically or electronically for two years; the payer's TCC may have been reassigned by IRS/MCC. Payers, who are aware that the TCC assigned will no longer be used, are requested to notify IRS/MCC so these numbers may be reassigned; **or**
- (b) The payer's magnetic media files were transmitted in the past by a service bureau using the service bureau's TCC, but now the payer has computer equipment compatible with that of IRS/MCC and wishes to prepare his or her own files. The payer must request a TCC by filing Form 4419.

.10 One Form 4419 may be submitted regardless of how many types of media or methods are used to file the return. **Multiple TCCs will only be issued to payers with multiple TINs. Only one TCC will be issued per TIN unless the filer has checked the application for the following forms in addition to the Forms 1099; Form 1042-S, Form 8027, and/or Form W-4. A separate TCC will be assigned for each of these forms.**

.11 In accordance with Regulations section 1.6041-7(b), payments by separate departments of a health care carrier to providers of medical and health care services may be reported on separate returns on magnetic media. In this case, the headquarters will be considered the transmitter, and the individual departments of the company filing reports will be considered payers. A single Form 4419 covering all departments filing on magnetic media should be submitted. One TCC may be used for all departments.

.12 Approval to file does not imply endorsement by IRS/MCC of any computer software or of the quality of tax preparation services provided by a service bureau or software vendor.

Sec. 8. Test Files

.01 IRS/MCC does not require test files, **except** for filers wishing to participate in the Combined Federal/State Filing Program (See Part A, Sec. 16, for further information concerning the Combined Federal/State Filing Program).

.02 IRS/MCC encourages first-time magnetic media or electronic filers to submit a test. The test file must consist of a sample of each type of record:

- (a) Transmitter "T" Record (all fields marked required must include transmitter information)
- (b) Payer "A" Record (must not be fictitious data)
- (c) Multiple Payee "B" Records (**at least 11 "B" Records per each "A" Record**)
- (d) End of Payer "C" Record
- (e) State Totals "K" Record, if participating in the Combined Federal/State Filing Program
- (f) End of Transmission "F" Record (See Part B for record formats.)

.03 Use the Test Indicator "T" in Field Position 28 of the "T" Record to show this is a test file.

.04 IRS/MCC will check the file to ensure it meets the specifications of this revenue procedure. For current filers, sending a test file will provide the opportunity to ensure their software reflects any programming changes. If unable to submit a magnetic or electronic test file, a hard copy printout that shows a sample of each record type (T, A, B, C, and F) may be submitted. **The hard copy print test is not acceptable for Combined Federal/State Filing approval.**

.05 Tests should be sent to IRS/MCC between November 1 and December 15. The test file must be received at MCC by December 15 in order to be processed. Filers may begin submitting test tapes and diskettes after October 1; however, the data will not be processed until on or after November 1.

.06 For tests filed electronically, the transmitter **must** send the signed Form 4804, Transmittal of Information Returns Reported Magnetically/Electronically, the same day the transmission is made. For tests filed on magnetic tape, tape cartridge, 8mm, 4mm, and quarter inch cartridge, 5 1/4- and 3 1/2-inch diskette, the transmitter must include the signed Form 4804 in the same package with the corresponding magnetic media. Mark the "TEST" box in Block 1 on the form. Also, mark "TEST" on the external media label.

If submitting a hard copy printout, mark the printout as "TEST" and include name, telephone number, and address of a person who can be contacted to discuss its acceptability.

.07 IRS/MCC will send a letter of acknowledgment to indicate the test results. Unacceptable magnetic media files, along with documentation identifying the errors, will be returned. Resubmission of test files must be received by IRS/MCC no later than December 15.

.08 Successfully processed media will not be returned to filers.

Sec. 9. Filing of Information Returns Magnetically/Electronically and Retention Requirements

.01 Form 4804, Transmittal of Information Returns Reported Magnetically/Electronically, Form 4802, Transmittal of Information Returns Reported Magnetically/Electronically (Continuation), or a computer-generated substitute, must accompany **all** magnetic media shipments. For electronic transmissions, the Form 4804 and Form 4802, if applicable, must be sent the same day as the electronic transmission. Form 4802, Transmittal of Information Returns Reported Magnetically/Electronically (Continuation), is a continuation of Form 4804 and should only be used if the filer is reporting more than five types of returns and/or more than five payers. Form 4802 is not a stand-alone form; it can only accompany Form 4804.

.02 IRS/MCC allows for the use of computer-generated substitutes for Form 4804/4802. The substitutes must contain all information requested on the original forms including the affidavit and signature line. Photocopies are acceptable but an original signature is required. **When using computer-generated forms, be sure to mark very clearly which tax year is being reported. This will eliminate a phone communication from IRS/MCC to question the tax year.**

.03 A transmitter may report for any combination of payers and/or documents in a submission. Each file must begin with a "T" Record and end with an "F" record for the end of a transmission. For example, if reporting Forms 1099-INT for Bank A, Forms 1099-DIV for Bank B, and Forms 1098 for Bank C, three separate tapes or diskettes need not be created. All three banks and all types of documents can be coded within a file on one tape or diskette as long as each bank or type of return has a separate "A" Record. Multiple tapes or diskettes can be sent in one package. For each separate type of media, the first record on the file must be the Transmitter "T" Record. **A Form 4804, Transmittal of Information Returns Reported Magnetically/Electronically, must be submitted for every Transmitter "T" Record. Filers must include Form 4804, 4802, or computer-generated substitute with their shipment.**

.04 Multiple types of media may be submitted in a shipment. However, submit a separate Form 4804 for each type of media.

.05 Current and prior year data may be submitted in the same shipment; however, each tax year must be on separate media, and a separate Form 4804 must be prepared to clearly indicate each tax year.

.06 Filers who have prepared their information returns in advance of the due date are encouraged to submit this information to IRS/MCC no earlier than January 1 of the year the return is due.

.07 **Do not report duplicate information. If a filer submits returns magnetically/electronically, identical paper documents must not be filed. This may result in erroneous penalty notices.**

.08 Form 4804 may be signed by the payer or the transmitter, service bureau, paying agent, or disbursing agent (all hereafter referred to as agent), on behalf of the payer. **Failure to sign the affidavit on Form 4804 may delay processing or could result in the files being returned unprocessed.** An agent may sign the Form 4804 if the agent has the authority to sign the affidavit under an agency agreement (either oral, written, or implied) that is valid under state law and adds the caption "FOR: (name of payer)."

.09 Although an authorized agent may sign the affidavit, the payer is responsible for the accuracy of the Form 4804 and the returns filed. The payer will be liable for penalties for failure to comply with filing requirements.

.10 A self-adhesive external media label, created by the filer, must be affixed to each tape and diskette. (IRS no longer provides self-adhesive labels for this purpose.) For instructions on how to prepare an external media label, refer to Notice 210 in the forms section. If diskettes are used, and the operating system is not MS-DOS compatible, the operating system and hardware information **must** be provided. Failure to provide this information may result in the diskettes being returned to the filer.

.11 On the outside of the shipping container, affix or attach a label which reads IRB Box ____ of ____ reflecting the number of containers in the shipment. (Filers can create a label with this information or cut out one of the labels on the special label page provided in this publication.) If there is only one container, mark the outside as Box 1 of 1. For multiple containers, include the sequence for example, Box 1 of 3, 2 of 3, 3 of 3).

.12 When submitting files include the following:

- (a) A **signed** Form 4804;
- (b) Form 4802, if applicable;
- (c) External media label (created by filer) affixed to magnetic media;
- (d) IRB Box ____ of ____ outside label.

☛ **Note: See Parts C and D for Electronic Submission Requirements.**

.13 If returns from different locations (using the same name and TIN) are submitted on the same file, IRS encourages the filer to consolidate each type of information return under one "A" Record. For example, all "B" Records for the same type of return should be together under one "A" Record and followed by the End of Payer "C" Record.

.14 IRS/MCC will not pay for or accept "Cash-on-Delivery" or "Charge to IRS" shipments of tax information that an individual or organization is legally required to submit.

.15 Payers should retain a copy of the information returns filed with IRS or have the ability to reconstruct the data for at least 3 years from the reporting due date, with the exception of Form 1099-C. A financial entity must retain a copy of Form 1099-C, Cancellation of Debt, or have the ability to reconstruct the data required to be included on the return, for at least 4 years from the date such return is required to be filed. Whenever backup withholding is imposed, a 4 year retention is required.

Sec. 10. Due Dates

As a result of due dates for Tax Year 1998 falling on weekends in 1999, the information returns, the recipient copies, and the participant copies will be treated as timely if filed or furnished on or before the following dates:

Forms 1098, 1099 and W-2G

Recipient Copy - February 1, 1999

IRS Copy - March 1, 1999

Forms 5498 and 5498-MSA

Participant Copy - June 1, 1999

IRS Copy - June 1, 1999

(Participants Copy Form 5498-for fair market value of account and for Education IRA Contributions-February 1, 1999)

.01 The due dates for filing paper returns with IRS also apply to magnetic media or electronic filing. Filing of information returns is on a calendar year basis, except for Forms 5498 and 5498-MSA, which are used to report amounts contributed during or after the calendar year (but not later than April 15).

.02 If any due date falls on a Saturday, Sunday or legal holiday, the return or statement is considered timely if filed or furnished on the next business day (i.e., the next day that is not a Saturday, Sunday, or legal holiday).

.03 Information returns filed magnetically/electronically for Forms 1098, 1099, and W-2G must be submitted to IRS/MCC postmarked on or before March 1, 1999.

.04 Returns postmarked by the United States Postal Service (USPS) on or before March 1, 1999, and delivered by United States mail to the IRS/MCC after the due date, are treated as timely under the "timely mailing as timely filing" rule. A similar rule applies to items delivered by private delivery services (PDSs) designated by the IRS. A PDS must be designated by the IRS before it will qualify for the timely mailing rule. Designation is determined with respect to each type of delivery service offered by a PDS (e.g., next day delivery, two day delivery, etc.). Notices 97-26, 1997-1 C.B. 413 and 97-50, 1997-37 I.R.B. 21 provide the list of designated PDSs and the types of delivery services designated. Designation is effective until the IRS issues a revised list of designated PDSs. Notice 97-26 also provides rules for determining the date that is treated as the postmark date. For items delivered by a non-designated PDS, the actual date of receipt by IRS/MCC will be used as the filing date. For items delivered by a designated PDS, but through a type of service not designated in Notice 97-26 and Notice 97-50, the actual date of receipt by IRS/MCC will be used as the filing date. The timely mailing rule also applies to furnishing statements to recipients and participants and filing Forms 5498 and 5498-MSA.

.05 Statements to recipients must be furnished on or before February 1, 1999 for TY98. Form 5498 statements to the participants must be furnished on or before February 1, 1999 for TY98 for the fair market value of the account and for contributions to an education IRA and by June 1, 1999 for TY98 for contributions made to all other types of IRAs for the prior calendar year.

.06 Forms 5498 and 5498-MSA filed magnetically or electronically must be filed with IRS/MCC on or before June 1, 1999 for TY98. Forms 5498 and 5498-MSA are filed for contributions to be applied to 1998 that are made January 1, 1998 through April 15, 1999 and/or to report the fair market value of any IRA/SEP/SIMPLE or medical savings account.

.07 Use this revenue procedure to prepare information returns filed magnetically or electronically beginning January 1, 1999 and received by IRS/MCC no later than December 15, 1999.

Sec. 11. Extensions of Time

.01 An extension of time to file may be requested for Forms 1099, 1098, 5498, 5498-MSA, W-2G, W-2 series of forms, and 1042-S.

.02 Form 8809, Request for Extension of Time To File Information Returns, should be submitted to IRS/MCC at the addresses listed later in this section. This form may be used to request an extension of time to file information returns submitted on paper, magnetically or electronically.

.03 Requesting an extension of time for multiple payers (50 or less) may be done by submitting Form 8809 and attaching a list of the payer names and their TINs (EIN or SSN). **The listing must be attached to ensure that the extension is recorded for all payers.** Form 8809 may be computer-generated or photocopied. Be sure that all the pertinent information is included.

.04 Requests for an extension of time to file for more than 50 payers are required to be submitted magnetically or electronically. Requests for an extension of time for 10 to 50 payers are encouraged to be filed magnetically or electronically. (See Part E, Sec. 3, for the record format.) The request may be filed on tape, tape cartridge, 5 ¼- or 3 ½-inch diskette, or electronically through the IRP-BBS or mainframe.

.05 If a filer does not have an IRS/MCC assigned Transmitter Control Code (TCC), a Form 4419, Application for Filing Information Returns Magnetically/Electronically, must be submitted to obtain a TCC. This number must be used to submit an extension request magnetically/electronically.

.06 All magnetically filed requests for an extension of time should be sent using the following addresses:

If by Postal Service: 
IRS-Martinsburg Computing Center
Information Reporting Program
Attn: Extension of Time Coordinator
P. O. Box 879
Kearneysville, WV 25430

If by truck or air freight: 
IRS-Martinsburg Computing Center
Information Reporting Program
Attn: Extension of Time Coordinator
Route 9 and Needy Road
Martinsburg, WV 25401

.07 Requests for extensions of time for multiple payers will be responded to with one approval letter, accompanied by a list of payers covered under that approval.

.08 **As soon as it is apparent** that a 30-day extension of time to file is needed, Form 8809 may be submitted. It will take a minimum of 30 days for IRS/MCC to respond to an extension request. Under certain circumstances, a request for an extension of time could be denied. When a denial letter is received, any additional or necessary information may be resubmitted within 20 days.

.09 If an additional extension of time is needed, a second Form 8809 must be filed by the initial extended due date. Check line 7 on the form to indicate that an additional extension is being requested. A second 30-day extension will be approved only in cases of extreme hardship or catastrophic event. **If requesting a second 30-day extension of time, submit the information return files as soon as prepared. Do not wait for MCC's response to your second extension request.**

.10 Form 8809 must be postmarked no later than the due date of the return for which an extension is requested. If requesting an extension of time to file several types of forms, use one Form 8809, but the Form 8809 must be postmarked no later than the earliest due date. For example, if requesting an extension of time to file both Forms 1099-INT and 5498, submit Form 8809 postmarked on or before March 1, 1999. Complete more than one Form 8809 to avoid this problem.

.11 If an extension request is approved, the approval letter should be kept on file. The approval letter or copy of the approval letter for an extension of time should not be sent to IRS/MCC with the magnetic media file or to the service center where the paper returns are filed.

.12 Request an extension for only one tax year.

.13 The extension request must be signed by the payer or a person who is duly authorized to sign a return, statement or other document for the payer.

.14 Failure to properly complete and sign the Form 8809 may cause delays in processing the request or result in a denial. Carefully read and follow the instructions on the back of the Form 8809.

.15 Form 8809 may be obtained by calling **1-800-TAX-FORM (1-800-829-3676)**. The form is also available on **IRP-BBS at 304-264-7070** or on **Internet at <http://www.irs.ustreas.gov>**. A copy of the Form 8809 is also provided in the back of the Publication 1220.

.16 Request an extension of time to furnish the statements to recipients of Forms 1098, 1099, 5498, W-2G, W-2 series of forms, and 1042-S by submitting a letter to IRS/MCC containing the following information:

- (a) Payer name
- (b) TIN
- (c) Address
- (d) Type of return
- (e) Specify that the extension request is to provide statements to recipients.
- (f) Reason for delay
- (g) Signature of payer or person duly authorized

Requests for an extension of time to furnish the statements for Forms 1098, 1099, 5498, W-2G, W-2 series of forms, and 1042-S to recipients are not automatically approved; however, if approved, generally an extension will allow a maximum of 30 additional days from the due date to furnish the statements to the recipients. The request must be postmarked by the date on which the statements are due to the recipients.

Sec. 12. Processing of Information Returns Magnetically/Electronically

.01 All data received at IRS/MCC for processing will be given the same protection as individual income tax returns (Form 1040). IRS/MCC will process the data and determine if the records are formatted and coded according to this revenue procedure.

.02 If the data is formatted incorrectly, the file will be returned for replacement accompanied with a Media Tracking Slip (Form 9267). When media is returned, it is because IRS/MCC encountered errors (not limited to format) and was unable to process the media, therefore, requiring a replacement. Open all packages immediately.

.03 Files must be corrected and returned with the Media Tracking Slip (Form 9267) to IRS/MCC within 45 days from the date of the letter IRS/MCC included with the returned files. A penalty for failure to file correct information returns by the due date will be assessed if the files are not corrected and returned within the 45 days **or if the incorrect files are returned by IRS/MCC for replacement more than two times**. A penalty for intentional disregard of filing requirements will be assessed if a replacement file is not received. (For penalty information, refer to the Penalty section of the 1998 "Instructions for Forms 1099, 1098, 5498, and W-2G.")

.04 Sample records identifying errors encountered will be provided with the returned media. It is the responsibility of the transmitter to check the entire file for similar errors.

.05 The following definitions have been provided to help distinguish between a correction and a replacement:

- A **correction** is an information return submitted by the transmitter to correct an information return that was previously submitted to and processed by IRS/MCC, but contained erroneous information.
- A **replacement** is an information return file that IRS/MCC has returned to the transmitter due to errors encountered during processing. After necessary changes have been made, the file must be returned for processing along with the Media Tracking Slip (Form 9267) which was included in the shipment from IRS/MCC.
- **Filers should never send anything to IRS/MCC marked "Replacement" unless IRS/MCC returned media to them.**

.06 IRS/MCC will not return media after successful processing. Therefore, if the transmitter wants proof that IRS/MCC received a shipment, the transmitter should select a service with tracking capabilities or one that will provide proof of delivery.

.07 IRS/MCC will work with filers as much as possible to assist with processing problems. **If the filer is contacted by IRS/MCC, a prompt response is important. IRS/MCC may have information that the filer needs to correct his or her file.**

.08 IRS/MCC contacts payers who have submitted payee data with missing TINs in an attempt to prevent errors that could result in penalties. Payers who submit data with missing TINs and have taken the required steps to obtain this information are encouraged to attach a letter of explanation to the required Form 4804. This will prevent unnecessary contact from IRS/MCC. This letter, however, will not prevent backup withholding notices (CP2100 or CP2100A Notices) or penalties for missing or incorrect TINs.

.09 Do not use special shipping containers for transmitting data to IRS/MCC. Shipping containers will not be returned.

Sec. 13. Corrected Returns

.01 The magnetic media filing requirement of information returns of 250 or more applies separately to both original and corrected returns.

- E** If a payer has 100 Forms 1099–A to be corrected, they can be filed on paper since they fall under the 250 threshold. However,
- X** if the payer has 300 Forms 1099–B to be corrected, they must be filed magnetically or electronically since they meet the 250 threshold.
- A** If for some reason a payer cannot file the 300 corrections on magnetic media, to avoid penalties, a request for a waiver must be submitted before filing on paper. If a waiver is approved for original documents, any corrections for the same type of return will be covered under this waiver.
- M**
- P**
- L**
- E**

.02 Corrections should be filed **as soon as possible**. Corrections filed after August 1 may be subject to the maximum penalty of \$50 per return. Corrections filed by August 1 may be subject to a lesser penalty. (For information on penalties, refer to the Penalty section of the 1998 “Instructions for Forms 1099, 1098, 5498, and W–2G.”) However, if payers discover errors after August 1, they may still be required to file corrections so they will not be subject to a penalty for intentional disregard of the filing requirements. Failure to correct information returns may result in penalties for failure to provide correct information. **All fields must be completed with the correct information, not just the data fields needing correction.** Submit corrections only for the returns filed in error, not the entire file. Furnish corrected statements to recipients as soon as possible.

.03 There are numerous types of errors, and in some cases, more than one transaction may be required to correct the initial error. **If the original return was filed as an aggregate, the filers must consider this in filing corrected returns.**

.04 Corrected returns may be included on the same medium as original returns; however, separate “A” Records are required. Corrected returns must be identified on the Form 4804 and the external media label by indicating “Correction.” **If filers discover that certain information returns were omitted on their original file, they must not code these documents as corrections. The file must be coded and submitted as originals.**

.05 If a payer discovers errors for prior years that affect a large number of payees, in addition to sending IRS the corrected returns and notifying the payees, a letter containing the following information should be sent to IRS/MCC:

- (a) Name and address of payer
- (b) Type of error (please explain clearly)
- (c) Tax year
- (d) Payer TIN
- (e) TCC
- (f) Type of Return
- (g) Number of Payees

This information will be forwarded to the appropriate office in an attempt to prevent erroneous notices from being sent to the payees. The correction must be submitted on an actual information return document or filed magnetically/electronically. Provide the correct tax year in Block 2 of the Form 4804 and on the external media label.

.06 Prior year data, original and corrected, **must** be filed according to the requirements of this revenue procedure. If submitting prior year corrections, use the record format for the current year and submit on separate media. However, use the actual year designation of the correction in Field Positions 2–5. If filing electronically, a separate transmission must be made for each tax year.

.07 In general, filers should submit corrections for returns filed within the last 3 calendar years (4 years if the payment is a reportable payment subject to backup withholding under section 3406 of the Code).

.08 All paper returns, whether original or corrected, must be filed with the appropriate service center.

.09 Form 4804 and Form 4802 (if applicable), must be submitted with corrected files submitted magnetically or electronically.

.10 The “B” Record provides a 20-position field for the Payer’s Account Number for the Payee. This number will help identify the appropriate incorrect return if more than one return is filed for a particular payee. **Do not enter a TIN in this field.** A payer’s account number for the payee may be a checking account number, savings account number, serial number, or any other number assigned to the payee by the payer that will distinguish the specific account. This number should appear on the initial return and on the corrected return in order to identify and process the correction properly.

.11 The record sequence for filing corrections is the same as for original returns.

.12 Review the chart that follows. Errors normally fall under one of the two categories listed. Next to each type of error made is a list of instructions on how to file the corrected return.

How To File the Corrected Return

Two (2) separate transactions are required to make the following corrections properly. Follow the directions for both Transactions 1 and 2. (See Note 1)

 - (a) No payee TIN (SSN, ITIN, ATIN, or EIN)

The information in the "A" record will be exactly the same as it was in the original submission with one exception, the Correction File Indicator must be set to "1" (one) in Field Position 50. E. The Payee "B" Records must contain exactly the same information as submitted previously, except, insert a Corrected Return Indicator Code of "G" in Field Position 6 of the "B" Records, and for all payment amounts, enter "0" (zero). F. Corrected returns submitted to IRS/MCC using "G" coded "B" Records may be on the same file as those returns submitted with a "C" code; however, separate "A" Records are required. G. ☛ **Note 1:** Payers who can show they have reasonable cause (defined in the regulations under section 6724 of the Internal Revenue Code) are not required to make corrections for returns filed with a missing or incorrect name and/or TIN. These payers should change their records in order to submit correct information in the future. Payers who cannot show reasonable cause are encouraged to make corrections for the current processing year by August 1 to reduce applicable penalties. Corrections filed by August 1 will reduce the \$50 per return penalty for filing returns with missing or incorrect information to \$30. The penalty is further reduced to \$15 per return if the corrections are filed within 30 days of the due date. (For penalty information, refer to the Penalty section of the 1998 "Instructions for Forms 1099, 1098, 5498, and W-2G.") Corrections filed after August 1 will not reduce the penalty but will allow IRS to update the payee's records. The regulations for IRC section 6724 are available in Publication 1586, Reasonable Cause Regulations and Requirements for Missing and Incorrect Name/TINs. The publication may be obtained by calling 1-800-TAX-FORM (1-800-829-3676).

Sec. 14. Taxpayer Identification Number (TIN)

.01 Section 6109 of the Internal Revenue Code requires a person to furnish his/her TIN to the person obligated to file the information return.

.02 The payee's TIN and name combination is used to associate information returns reported to IRS/MCC with corresponding information on tax returns. It is imperative that **correct** Taxpayer Identification Numbers (TINs) for payees be provided to IRS/MCC. **Do not enter hyphens or alpha characters.** Entering all zeros, ones, twos, etc., will have the effect of an incorrect TIN.

.03 The payer and payee names with associated TINs should be consistent with the names and TINs used on other tax returns. Also, the name and TIN provided **must** belong to the owner of the account. If the account is recorded in more than one name, furnish the name and TIN of one of the owners of the account. The TIN provided **must** be associated with the name of the payee provided in the first name line of the "B" Record. For individuals, the payee TIN is generally the payee's Social Security Number (SSN). For other entities, the payee TIN is the payee's Employer Identification Number (EIN). The payee TIN may also refer to an Individual Taxpayer Identification Number (ITIN) or Adoption Taxpayer Identification Number (ATIN). For sole proprietors, the payee TIN may be either an SSN or EIN but **the sole proprietor's name** (not the business name) **must be used on the first name line.**

.04 Failure to provide the correct name and corresponding TIN could result in a penalty and/or backup withholding notice (sometimes referred to as a "B" notice). (For penalty information, refer to the Penalty section of the 1998 "Instructions for Forms 1099, 1098, 5498, and W-2G." For "B" Notice information, refer to the Backup Withholding section of the same publication.)

.05 The following charts will help payers determine the TIN to be furnished to IRS/MCC for those persons for whom they are reporting information (payees).

Sec. 15. Effect on Paper Returns and Statements to Recipients

.01 Magnetic/electronic reporting of information returns eliminates the need to submit paper documents to the IRS. **CAUTION! Do not send Copy A of the paper forms to IRS/MCC in addition to magnetic media and electronic filing.** This will result in duplicate filing; therefore, erroneous notices could be generated.

.02 Payers are responsible for providing statements to the payees as outlined in the 1998 “Instructions for Forms 1099, 1098, 5498, and W-2G.” Refer to these instructions for filing information returns on paper with the IRS and furnishing statements to recipients.

.03 Statements to recipients should be clear and legible. If the official IRS form is not used, the filer must adhere to the specifications and guidelines in Publication 1179, “Rules and Specifications for Private Printing of Substitute Forms 1096, 1098, 1099, 5498, and W-2G.”

Sec. 16. Combined Federal/State Filing Program

.01 The Combined Federal/State Filing Program was established to simplify information returns filing for the taxpayer. IRS/MCC will forward this information to participating states free of charge for approved filers. Separate reporting to those states is not necessary. The following information returns may be filed under the Combined Federal/State Filing Program:

Form 1099-DIV ———	Dividends and Distributions
Form 1099-G ———	Certain Government Payments
Form 1099-INT ———	Interest Income
Form 1099-MISC ———	Miscellaneous Income
Form 1099-OID ———	Original Issue Discount
Form 1099-PATR ———	Taxable Distributions Received from Cooperatives
Form 1099-R ———	Distributions from Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.
Form 5498 ———	IRA

The following information returns **may not** be filed under this program:

Form 1098 ———	Mortgage Interest Statement
Form 1098-E ———	Student Loan Interest Statement
Form 1098-T ———	Tuition Payments Statement
Form 1099-A ———	Acquisition or Abandonment of Secured Property
Form 1099-B ———	Proceeds From Broker and Barter Exchange Transactions
Form 1099-C ———	Cancellation of Debt
Form 1099-LTC ———	Long-Term Care and Accelerated Death Benefits
Form 1099-MSA ———	Distributions From Medical Savings Accounts
Form 1099-S ———	Proceeds From Real Estate Transactions
Form 5498-MSA ———	Medical Savings Account Information
Form W-2G ———	Certain Gambling Winnings

.02 To request approval to participate, a magnetic media or electronic test file coded for this program **must** be submitted to IRS/MCC between November 1 and December 15. **Hard copy print tests are not acceptable** for Combined Federal/State Filing approval.

.03 Attach a letter to the Form 4804 submitted with the test file to indicate a desire to participate in this program.

.04 A test file is only required for the first year. Each record, both in the test and the actual data file, must conform to this revenue procedure.

.05 If the test file is acceptable, IRS/MCC will send the filer an approval letter, and a Form 6847, Consent for Internal Revenue Service to Release Tax Information, which the payer **must** complete, sign, and return to IRS/MCC before any tax information can be released to the state. Filers must write their TCC on Form 6847.

.06 If the test file is not acceptable, IRS/MCC will return the media with a letter indicating the problems. The replacement test file must be returned to IRS/MCC postmarked on or before December 15.

.07 A separate Form 6847 is **required** for each payer. A transmitter may not combine payers on one Form 6847 even if acting as Attorney-in-Fact for several payers. Form 6847 may be computer-generated as long as it includes all information that is on the original form or it may be photocopied. If the Form 6847 is signed by an Attorney-in-Fact, the written consent from the payer must clearly indicate that the Attorney-in-Fact is empowered to authorize release of the information.

.08 Only code the records for participating states and for those payers who have submitted Form 6847.

.09 Some participating states require separate notification that the payer is filing in this manner. Since IRS/MCC acts as a forwarding agent only, **it is the payer's responsibility to contact the appropriate states for further information.**

.10 All corrections properly coded for the Combined Federal/State Filing Program will be forwarded to the participating states.

.11 Participating states and corresponding valid state codes are listed in **Table 1** of this section. The appropriate state code **must** be entered for those documents that meet the state filing requirements; **do not use state abbreviations.**

.12 To simplify filing, some of the participating states have provided their information return reporting requirements (see **Table 2**). **Each state's filing requirements are subject to change by the state. It is the payer's responsibility to contact the participating states to verify the criteria provided in this table.**

.13 Upon submission of the actual files, the transmitter must be sure of the following:

- (a) All records should be coded exactly as required by this revenue procedure.
- (b) The "C" Record **must be** followed by a State Totals "K" Record for each state being reported.
- (c) Payment amount totals and the valid participating state code must be included in the State Totals "K" Record.
- (d) The last "K" Record **must be** followed by an "A" Record or an End of Transmission "F" Record (if this is the last record of the entire file).

Sec. 17. Definition of Terms

Element

Asynchronous Protocols

Description

This type of data transmission is most often used by microcomputers, PCs and some mini-computers. Asynchronous transmissions transfer data at arbitrary time intervals using the start-stop method. Each character transmitted has its own start bit and stop bit.

ATIN

<i>Element</i>	<i>Description</i>
	adoption. When the adoption becomes final, the adoptive parent must apply for a social security number for the child.
b	Denotes a blank position. Enter blank(s) when this symbol is used (do not enter the letter “b”). This appears in numerous areas throughout the record descriptions.
Bisynchronous Protocols	For purposes of this publication, these are electronic transmissions made using IBM 3780 protocols. These transmissions must be in EBCDIC character code and use the Bell 208B (4800bps), AT&T 2296A (9600bps) or Hayes OPTIMA 288 V.FC Smartmodem (14400bps) modems. Standard IBM 3780 space compression is acceptable.
Correction	A correction is an information return submitted by the transmitter to correct an information return that was previously submitted to and processed by IRS/MCC, but contained erroneous information.
☛ Note: A correction should not be confused with a replacement. Only media returned to the filer by IRS/MCC due to processing problems should be marked replacement.	
CUSIP Number	A number developed by the Committee on Uniform Security Identification Procedures to serve as a common denominator in communications among users for security transactions and security information.
Employer Identification Number (EIN).	A nine-digit number assigned by IRS for federal tax reporting purposes.
Electronic Filing	Submission of information returns using switched telecommunications network circuits. These transmissions use modems, dial-up phone lines, and asynchronous or bisynchronous protocols. See Parts A, C, and D of this publication for specific information on electronic filing.
File	For purposes of this revenue procedure, a file consists of one Transmitter “T” Record at the beginning of the file, followed by a Payer “A” Record, Payee “B” Records, and an End of Payer “C” Record after each set of “B” Records. The last record on the file will be the End of Transmission “F” Record. Nothing should be reported after the End of Transmission “F” Record.
Filer	Person (may be payer and/or transmitter) submitting information returns to IRS.
Filing Year	The actual year in which the information returns are being submitted to IRS.
Golden Parachute Payment	A payment made by a corporation to a certain officer, shareholder, or highly compensated individual when a change in the ownership or control of the corporation occurs or when a change in the ownership of a substantial part of the corporate assets occurs.
Incorrect Taxpayer Identification Number (Incorrect TIN)	<p>A TIN may be incorrect for several reasons:</p> <ul style="list-style-type: none"> (a) The payee provided a wrong number or name (e.g., the payee is listed as the only owner of an account but provided someone else’s TIN). (b) A processing error (e.g., the number or name was typed incorrectly). (c) The payee’s status changed (e.g., a payee name change was not conveyed to the IRS or SSA so they could enter the change in their records).
Individual Taxpayer Identification Number (ITIN)	A nine digit number issued by IRS to individuals who are required to have a U.S. Taxpayer Identification Number but are not eligible to obtain a Social Security Number (SSN).
Information Return	The vehicle for submitting required information about another person to IRS. Information returns are filed by financial institutions and by others who make certain types of payments as part of their trade or business. The information required to be reported on an information return includes interest, dividends, pensions, nonemployee compensation for personal services, stock transactions, sales of real estate, mortgage interest, and other types of information. For this revenue procedure, an information return is a Form 1098, 1098-E, 1098-T, 1099-A, 1099-B, 1099-C, 1099-DIV, 1099-G, 1099-INT, 1099-LTC, 1099-MISC, 1099-MSA, 1099-OID, 1099-PATR, 1099-R, 1099-S, 5498, 5498-MSA or W-2G.

<i>Element</i>	<i>Description</i>
Magnetic Media	For this revenue procedure, the term “magnetic media” refers to ½-inch magnetic tape; IBM 3480/3490/3490E or AS400 compatible tape cartridge; 8mm, 4mm, and QIC (Quarter Inch Cartridges) cartridge or 5¼- and 3½-inch diskette.
Media Tracking Slip (Form 9267)	Form 9267 accompanies media that IRS/MCC has returned to the filer for replacement due to incorrect format or errors encountered when trying to process the media. This must be returned with the replacement file.
Missing Taxpayer Identification Number (Missing TIN)	The payee TIN on an information return is “missing” if: <ul style="list-style-type: none"> (a) there is no entry in the TIN field, (b) includes one or more alpha characters (a character or symbol other than an Arabic number) as one of the nine digits, OR (c) payee TIN has less than nine digits.
PS 58 Costs	The current cost of life insurance under a qualified plan taxable under section 72(m) and section 1.72–16(b) of the Income Tax Regulations. (See Part B, Sec. 10, Payee “B” Record, Document Specific/Distribution Code, Category of Distribution, Code 9.)
Payee	Person or organization receiving payments from the payer, or for whom an information return must be filed. The payee includes a student (Form 1098–T), borrower (Forms 1098, 1098–E, and 1099–A), a debtor (Form 1099–C), a policyholder or insured (Form 1099–LTC), any IRA/SEP/SIMPLE plan participant (Form 5498), and a gambling winner (Form W–2G). For Form 1099–S, the payee is the seller or other transferor.
Payer	Includes the person making payments, a recipient of mortgage interest payments, a recipient of student loan interest payments, a broker, a person reporting a real estate transaction, a barter exchange, a creditor, a trustee or issuer of any IRA/SEP/SIMPLE, or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned. The payer will be held responsible for the completeness, accuracy, and timely submission of magnetic media files.
Replacement	A replacement is an information return file that IRS/MCC has returned to the transmitter due to errors encountered during processing.
<p>☛ Note: Filers should never submit media to IRS/MCC marked “Replacement” unless IRS/MCC returned media to the filers. When sending “Replacement” media, be sure to include the Media Tracking Slip (Form 9267) which will accompany media returned by IRS/MCC. Media that has been incorrectly marked as Replacement may result in duplicate filing.</p>	
Service Bureau	Person or organization with whom the payer has a contract to prepare and/or submit information return files to IRS/MCC. A parent company submitting data for a subsidiary is not considered a service bureau.
Social Security Number (SSN)	A nine-digit number assigned by SSA to an individual for wage and tax reporting purposes.
Special Character	Any character that is not a numeric, an alpha, or a blank.
SSA	Social Security Administration.
Taxpayer Identification Number (TIN)	Refers to either an Employer Identification Number (EIN), Social Security Number (SSN), Individual Taxpayer Identification Number (ITIN), or Adoption Taxpayer Identification Number (ATIN).
Tax Year	Generally, the year in which payments were made by a payer to a payee.
Transfer Agent	The transfer agent, or paying agent, is the entity who has been contracted or authorized by the payer to perform the services of paying and reporting backup withholding (Form 945).
Transmitter	Refers to the person or organization submitting file(s) magnetically/electronically. The transmitter may be the payer or agent of the payer.
Transmitter Control Code (TCC)	A five character alpha/numeric number assigned by IRS/MCC to the transmitter prior to actual filing magnetically or electronically. This number is inserted in the “T” Record of the files and must be present before the file can be processed. An application Form 4419 must be filed with IRS/MCC to receive this number.

<i>Element</i>	<i>Description</i>
Vendor	Vendors include service bureaus that produce information return files on the prescribed types of magnetic media or via electronic filing for payers. Vendors also include companies who provide software for payers who wish to produce their own media or electronic files.

Sec. 18. State Abbreviations

.01 The following state and U.S. territory abbreviations are to be used when developing the state code portion of address fields. This table provides state and territory abbreviations only, and does not represent those states participating in the Combined Federal/State Filing Program.

State	Code	State	Code	State	Code
Alabama	AL	Kentucky	KY	Ohio	OH
Alaska	AK	Louisiana	LA	Oklahoma	OK
American Samoa	AS	Maine	ME	Oregon	OR
Arizona	AZ	Marshall Islands	MH	Pennsylvania	PA

Colorado	CO	Michigan	MI	South Carolina	SC
Connecticut	CT	Minnesota	MN	South Dakota	SD
Delaware	DE	Mississippi	MS	Tennessee	TN
District of Columbia	DC	Missouri	MO	Texas	TX
Federated States of Micronesia	FM	Montana	MT	Utah	UT
Florida	FL	Nebraska	NE	Vermont	VT

Illinois	IL	New York	NY	Wisconsin	WI
Indiana	IN	North Carolina	NC	Wyoming	WY
Iowa	IA	North Dakota	ND		
Kansas	KS	Northern Mariana Islands	MP		

*This abbreviation applies to the United States Virgin Islands.

.02 Filers must adhere to the city, state, and ZIP Code format for U. S. addresses in the “B” Record. This also includes American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Northern Mariana Islands, Puerto Rico, and the U. S. Virgin Islands.

.03 For foreign country addresses, filers may use a 51 position free format which should include city, province or state, postal code, and name of country in this order. This is allowable only if a “1” (one) appears in the Foreign Country Indicator, Field Position 247 of the “B” Record.

.04 When reporting APO/FPO addresses use the following format:

EXAMPLE:

Payee Name	PVT Willard J. Doe
Mailing Address	Company F, PSC Box 100 167 Infantry REGT
Payee City	APO (or FPO)
Payee State	AE, AA, or AP*
Payee ZIP Code	098010100

*AE is the designation for ZIPs beginning with 090–098, AA for ZIP 340, and AP for ZIPs 962- 966.

Sec. 19. Major Problems Encountered

IRS/MCC encourages filers to verify the format and content of each type of record to ensure the accuracy of the data. This may eliminate the need for IRS/MCC to return files for replacement. This may be important for those payers who have either had their

files prepared by a service bureau or who have purchased preprogrammed software packages. **If a filer purchased a software package for a previous tax year, it will not be valid for reporting current tax year information returns due to the new record format.**

Filers who engage a service bureau to prepare media on their behalf should be careful not to report duplicate data which may generate penalty notices.

The Major Problems Encountered lists some of the most frequently encountered problems with magnetic/electronic files submitted to IRS/MCC. These problems may result in media being returned for replacement.

1. No Form 4804, Transmittal of Information Returns Reported Magnetically/Electronically

Each shipment of media sent to IRS/MCC must include a Form 4804. More than one type of media may be sent in the same shipment, (i.e., a tape, a diskette, or a tape cartridge) but must have a separate Form 4804 to accompany **each type of media**. In this example three separate Forms 4804 would be required in the total shipment. However, multiples of one type of media (6 diskettes) may be covered by one Form 4804. For electronically transmitted information returns, the Form 4804 must be mailed to IRS/MCC the same day as the transmission.

2. Discrepancy between IRS/MCC totals and totals in Payer “C” Records

The “C” Record is a summary record for a type of return for a given payer as reported in the “B” Records. IRS balances the total number of payees and payment amounts and compares them with totals in the “C” Records. Filers should verify the accuracy of the records because imbalances may necessitate return of files for replacement.

3. The Payment Amount Fields in the “B” Record do not correspond to the Amount Codes in the “A” Record

If codes 2, 4, and 7 appear in the Amount Codes Field of the “A” Record, then the “B” Record must show payment amounts in only Fields 2, 4, and 7, right-justified and unused positions **must be** zero (0) filled.

EXAMPLE: “A” RECORD	247 bbbbbbbb —	(‘b’ denotes a blank)
	(Pos. 28–39)	
“B” RECORD	000000867599 —	(Payment Amount 2)
	(Pos. 67–78)	
	000000709097 —	(Payment Amount 4)
	(Pos. 91–102)	
	000000044985 —	(Payment Amount 7)
	(Pos. 127–138)	

4. Blanks or invalid characters appear in Payment Amount Fields in the “B” Record

Money amounts must be right-justified and zero (0) filled. **Do not use blanks.**

5. Incorrect TIN in Payer “A” Record

The Payer’s TIN reported in positions 12–20 of the “A” Record must be nine numeric characters (no alphas or special characters) in order for IRS/MCC to process the media. The TIN provided in the “A” Record must correspond with the name provided in the first payer name line.

6. Bad Format

NOTE: Due to major format changes in the record expansion and layout, IRS/MCC strongly encourages transmitters, vendors, and filers to read the Revenue Procedure in its entirety.

IRS/MCC receives data in prior year format. Be sure to use **the current revenue procedure (Publication 1220)** for formatting data.

7. Incorrect tax year in the Transmitter “T” Record, Payer “A” Record and the Payee “B” Record

The tax year in the transmitter, payer and payee records should reflect the year of the information being reported. Filers need to check their files to ensure this information is correct.

Due to Year 2000 compliance changes, the year format has expanded to four (4) positions.

8. Incorrect reporting of Form W–2 information to IRS

Form W–2 information is submitted to SSA, and **not** to IRS/MCC. SSA has its own magnetic media reporting program and specifications for wage information, and the media containing Forms W–2 is submitted to SSA. Any media received at IRS/MCC that con-

tains Form W-2 information will be returned to the filer. To inquire about filing Form W-2 information magnetically, call 1-800-SSA-1213.

9. Excessive withholding credits

Generally, for most information returns, other than Forms 1099-G, 1099-MISC, 1099-R, and W-2G, Federal withholding amounts should **not** exceed 31 percent of the income reported. Validate the total reported in the withholding field against the total income reported.

10. Incorrect format for TINs in the Payee “B” Record

A check of “B” records should be made to ensure the Taxpayer Identification Numbers (TINs) are formatted correctly. There should be nine numerics, **no alphas, hyphens, commas, or blanks**. Incorrect formatting of TINs may result in a penalty.

IRS/MCC contacts filers who have submitted payee data with missing TINs in an attempt to prevent errors that could result in penalties. Payers/transmitters who submit data with missing TINs, and have taken the required steps to obtain this information are encouraged to attach a letter of explanation to the required Form 4804. This will prevent unnecessary contact from IRS/MCC. This letter, however, will not prevent backup withholding notices (CP2100 and CP2100A Notices) or penalties for missing or incorrect TINs. For penalty information, refer to the Penalty section of the 1998 “Instructions for Forms 1099, 1098, 5498, and W-2G.”

11. Distribution Codes for Form 1099-R reported incorrectly

Distribution codes for Form 1099-R are being reported incorrectly or not being reported. See valid distribution codes for Form 1099-R in the Payee “B” Record layout.

12. Incorrect Record Totals Listed on Form 4804

The Combined Total Payee Records listed on the Form 4804 (Block 9) are used in the verification process of information returns. The figure in this block should be the total number of Payee “B” Records contained on the media submitted with the Form 4804. The figures on the Form 4804 are compared against the total number of Payee “B” Records processed on the media. Imbalances may necessitate the return of the files for replacement.

13. Invalid Use of IRA/SEP/SIMPLE Indicator (Form 1099-R)

The IRA/SEP/SIMPLE Indicator for Form 1099-R should be used only for the reporting of a distribution from a traditional IRA/SEP/SIMPLE. The total amount distributed from a traditional IRA/SEP/SIMPLE should be reported in Payment Amount Field A (IRA/SEP/SIMPLE Distribution).

14. Distribution Codes used incorrectly in conjunction with the IRA/SEP/SIMPLE Indicator. (Form 1099-R)

When reporting Form 1099-R information, Distribution Codes G and H **MAY NOT be used in positions 545–546 of the “B” Record if the IRA/SEP/SIMPLE Indicator (1) is present in position 548 of the “B” Record**. This will cause media to be returned.

15. Failure to identify the rollover contributions and/or fair market value of the account for Form 5498

Rollover contributions (Amount Code 2 of the “A” Record) and/or fair market value of the account (Amount Code 4 of the “A” Record) for Form 5498 must be identified as an IRA (position 547 of the “B” Record), SEP (position 548 of the “B” Record), SIMPLE (position 549 of the “B” Record), Roth IRA (position 550 of the “B” Record), Roth Conversion (position 551 of the “B” Record), or Education IRA (position 552 of the “B” Record).

16. Media received without data

Before media is shipped, transmitters/filers should verify the presence of Form 1099 information returns on the media before sending the shipment to IRS/MCC.

Part B. Magnetic Media Specifications

Sec. 1. General

.01 The specifications contained in this part of the revenue procedure define the required format and contents of the records to be included in the magnetic media/electronic file.

.02 A provision is made in the “B” Records for entries which are optional. If the field is not utilized, enter blanks to maintain a fixed record length of 750 positions. Each field description explains the intended use of specific field positions.

.03 Transmitters should be consistent in the use of recording codes and density on files. If the media does not meet these specifications, it will be returned to the transmitter for replacement. Filers are encouraged to submit a test prior to submitting the actual file. Contact IRS/MCC for further information at 304-263-8700.

Sec. 2. Tape Specifications

.01 IRS/MCC can process most magnetic tape files if the following specifications are followed:

- (a) 9 track EBCDIC (Extended Binary Coded Decimal Interchange Code) with:
 - (1) Odd parity.
 - (2) A density of 1600 or 6250 CPI.
 - (3) If transmitters use UNISYS Series 1100, they must submit an interchange tape.
- (b) 9 track ASCII (American Standard Coded Information Interchange) with:
 - (1) Odd parity.
 - (2) A density of 1600 or 6250 CPI.

Transmitters should be consistent in the use of recording codes and density on files.

.02 All compatible tape files must have the following characteristics: Type of tape - ½-inch (12.7 mm) wide, computer-grade magnetic tape on reels of up to 2,400 feet (731.52 m) within the following specifications:

- (a) Tape thickness: 1.0 or 1.5 mils and
- (b) Reel diameter: 10 ½-inch (26.67 cm), 8 ½-inch (21.59 cm), 7-inch (17.78 cm), or 6-inch.

.03 The tape records defined in this revenue procedure may be blocked subject to the following:

- (a) A block **must not** exceed 32,250 tape positions.
- (b) If the use of blocked records would result in a short block, all remaining positions of the block must be filled with 9s; however, the last block of the file may be filled with 9s or truncated. **Do not pad a block with blanks.**
- (c) All records, except the header and trailer labels, may be blocked or unblocked. A record may not contain any control fields or block descriptor fields which describe the length of the block or the logical records within the block. The number of logical records within a block (the blocking factor) must be constant in every block with the exception of the last block which may be shorter (see item (b) above). The block length must be evenly divisible by 750.
- (d) Records may not span blocks.

.04 Labeled or unlabeled tapes may be submitted.

.05 For the purposes of this revenue procedure the following must be used:

Tape Mark:

- (a) Signifies the physical end of the recording on tape.
- (b) For even parity, use BCD configuration 001111 (8421).
- (c) May follow the header label and precede and/or follow the trailer label.

.06 IRS/MCC can only read one data file on a tape. A data file is a group of records which may or may not begin with a tapemark, but **must** end with a trailer label. Any data beyond the trailer label cannot be read by IRS programs.

Sec. 3. Tape Cartridge Specifications

.01 In most instances, IRS/MCC can process tape cartridges that meet the following specifications:

- (a) Must be IBM 3480, 3490, 3490E, or AS400 compatible.
- (b) Must meet American National Standard Institute (ANSI) standards, and have the following characteristics:
 - (1) Tape cartridges will be ½-inch tape contained in plastic cartridges which are approximately 4-inches by 5-inches by 1-inch in dimension.
 - (2) Magnetic tape will be chromium dioxide particle based ½-inch tape.
 - (3) Cartridges must be 18-track or 36-track parallel (See **Note**).
 - (4) Cartridges will contain 37,871 CPI or 75,742 CPI (characters per inch).
 - (5) Mode will be full function.
 - (6) The data may be compressed using EDRC (Memorex) or IDRC (IBM) compression.
 - (7) Either EBCDIC (Extended Binary Coded Decimal Interchange Code) or ASCII (American Standard Coded Information Interchange) may be used.

.02 The tape cartridge records defined in this revenue procedure may be blocked subject to the following:

- (a) A block **must not** exceed 32,250 tape positions.
- (b) If the use of blocked records would result in a short block, all remaining positions of the block must be filled with 9s; however, the last block of the file may be filled with 9s or truncated. **Do not pad a block with blanks.**
- (c) All records, except the header and trailer labels, may be blocked or unblocked. A record may not contain any control fields or block descriptor fields which describe the length of the block or the logical records within the block. The number of logical records within a block (the blocking factor) must be constant in every block with the exception of the last block which may be shorter (see item (b) above). The block length must be evenly divisible by 750.
- (d) Records may not span blocks.

.03 Tape cartridges may be labeled or unlabeled.

.04 For the purposes of this revenue procedure, the following must be used:

Tape Mark:

- (a) Signifies the physical end of the recording on tape.
- (b) For even parity, use BCD configuration 001111 (8421).
- (c) May follow the header label and precede and/or follow the trailer label.

☛ **Note: Filers should indicate on the external media label and transmittal Form 4804 whether the cartridge is 36-track or 18-track.**

Sec. 4. 8mm, 4mm, and Quarter Inch Cartridge Specifications

.01 In most instances, IRS/MCC can process 8mm tape cartridges that meet the following specifications:

(a) Must meet American National Standard Institute (ANSI) standards, and have the following characteristics:

- (1) Created from an AS400 operating system only.
- (2) 8mm (.315-inch) tape cartridges will be 2 ½-inch by 3 ¾-inch.
- (3) The 8mm tape cartridges must meet the following specifications:

Tracks	Density	Capacity
1	20 (43245 BPI)	2.5 Gb (10Gb)
1	21 (45434 BPI)	5 Gb (20 Gb)

- (4) Mode will be full function.
- (5) Compressed data is not acceptable.
- (6) Either EBCDIC (Extended Binary Coded Decimal Interchange Code) or ASCII (American Standard Coded Information Interchange) may be used. However, IRS/MCC encourages the use of EBCDIC. This information must appear on the external media label affixed to the cartridge.
- (7) A file may consist of more than one cartridge; however, no more than 250,000 documents may be transmitted per file or per cartridge. The filename, for example; IRSTAX, will contain a three digit extension. The extension will indicate the sequence of the cartridge within the file (e.g., 1 of 3, 2 of 3, and 3 of 3) and would appear in the header label IRSTAX.001, IRSTAX.002, and IRSTAX.003 on each cartridge of the file. **The end of transmission "F" Record should be placed only on the last cartridge for files containing multiple cartridges.**

.02 The 8mm (.315-inch) tape cartridge records defined in this revenue procedure may be blocked subject to the following:

- (a) A block **must not** exceed 32,250 tape positions.
- (b) If the use of blocked records would result in a short block, all remaining positions of the block must be filled with 9's; however, the last block of the file may be filled with 9's or truncated. **Do not pad a block with blanks.**
- (c) All records, except the header and trailer labels, may be blocked or unblocked. A record may not contain any control fields or block descriptor fields which describe the length of the block or the logical records within the block. The number of logical records within a block (the blocking factor) must be constant in every block with the exception of the last block which may be shorter (see item (b) above). The block length must be evenly divisible by 750.
- (d) Various COPY commands have been successful; however, the SAVE OBJECT COMMAND is not acceptable.
- (e) Extraneous data following the "F" Record will result in media being returned for replacement.
- (f) Records may not span blocks.
- (g) No more than 250,000 documents per cartridge and per file.

.03 For faster processing, IRS/MCC encourages transmitters to use header labeled cartridges. IRSTAX may be used as a suggested filename.

.04 For the purposes of this revenue procedure, the following must be used:

Tape Mark:

- (a) Signifies the physical end of the recording on tape.
- (b) For even parity, use BCD configuration 001111 (8421).
- (c) May follow the header label and precede and/or follow the trailer label.

.05 If extraneous data follows the End of Transmission "F" Record, the file will be returned for replacement. Therefore, IRS/MCC encourages transmitters to use blank tape cartridges, rather than cartridges previously used, in the preparation of data when submitting information returns.

.06 IRS/MCC can only read one data file on a tape. A data file is a group of records which may or may not begin with a tapemark, but must end with a trailer label. Any data beyond the trailer label cannot be read by IRS programs.

.07 4mm (.157-inch) cassettes are now acceptable with the following specifications:

- (a) 4 mm cassettes will be 2 ¼-inch by 3-inch.
- (b) The tracks are 1 (one).
- (c) The density is 19 (61000 BPI).
- (d) The typical capacity is DDS (DAT data storage) at 1.3 Gb or 2 Gb, or DDS-2 at 4Gb.

- (e) The general specifications for 8mm cartridges will also apply to the 4 mm cassettes.
- .08** Various Quarter Inch Cartridges (QIC) (¼-inch) are also acceptable.
- (a) QIC cartridges will be 4" by 6".
- (b) QIC cartridges must meet the following specifications:

Size	Tracks	Density	Capacity
QIC-11	4/5	4 (8000 BPI)	22Mb or 30Mb
QIC-24	8/9	5 (8000 BPI)	45Mb or 60Mb
QIC-120	15	15 (10000 BPI)	120Mb or 200Mb
QIC-150	18	16 (10000 BPI)	150Mb or 250Mb
QIC-320	26	17 (16000 BPI)	320Mb
QIC-525	26	17 (16000 BPI)	525Mb
QIC-1000	30	21 (36000 BPI)	1Gb
QIC-1350	30	18 (51667 BPI)	1.3Gb
QIC-2Gb	42	34 (40640 BPI)	2Gb

- (c) The general specifications that apply to 8mm cartridges will also apply to QIC cartridges.

Sec. 5. 5 ¼-inch and 3 ½-inch Diskette Specifications

IRS/MCC will discontinue processing 5 ¼ inch diskettes in the future. Filers who use 5 ¼ inch diskettes are encouraged to explore other methods by which to submit information returns magnetically/electronically.

- .01** To be compatible, a diskette file must meet the following specifications:
- (a) 5 ¼- or 3 ½-inches in diameter.
- (b) IRS recommends data be recorded in standard ASCII code. However, if data is recorded using EBCDIC, a 5 ¼-inch diskette must be used and a 1024 byte sector would be valid for System 36 or AS400.
- The following command should be used to format the diskette into a 1024 byte sector:

INIT IRSTAX,,FORMAT2

The save commands are as follows:

- (1) The save command for System 36 is SAVE.
- (2) The save command for AS400 is SAV36F.
- (c) Records must be a fixed length of 750 bytes per record.
- (d) Delimiter character commas (,) must not be used.
- (e) Positions 749 and 750 of each record have been reserved for use as carriage return/line feed (cr/lf) characters, if applicable.
- (f) Filename of IRSTAX must be used. Do not enter any other data in this field. If a file will consist of more than one diskette, the filename IRSTAX will contain a three-digit extension. This extension will indicate the sequence of the diskettes within the file. For example, if the file consists of three diskettes, the first diskette will be named IRSTAX.001, the second will be IRSTAX.002, and the third will be IRSTAX.003. The first diskette, IRSTAX.001 will begin with a "T" Record and the third diskette, IRSTAX.003 will have an "F" Record at the end of the file.
- (g) A diskette will not contain multiple files. (See Part A, Section 17 for definition of a file.)
- (h) Failure to comply with instructions will result in media being returned for replacement.
- (i) Diskettes must meet one of the following specifications:

Capacity	Tracks	Sides/Density	Sector Size
1.44 mb	96tpi	hd	512
1.44 mb	135tpi	hd	512
1.2 mb	96tpi	hd	512

.02 IRS/MCC encourages transmitters to use blank or currently formatted diskettes when preparing files. If extraneous data follows the End of Transmission "F" Record, the file will be returned for replacement.

.03 IRS/MCC prefers that 5 ¼- and 3 ½-inch diskettes be created using MS-DOS; however, diskettes created using other operating systems may be acceptable (See **Notes**). IRS/MCC has equipment that can convert diskettes created under most operating systems to the appropriate MS-DOS format. IRS/MCC strongly recommends that transmitters submit a test file for 5 ¼- and 3 ½-inch diskettes, especially if their data was not created using MS-DOS.

Notes: IRS/MCC will discontinue processing 5 ¼-inch diskettes in the future.

IRS will discontinue processing non-MS-DOS compatible diskettes in the future.

3 ½-inch diskettes created on a System 36 or AS400 are not acceptable.

.04 Transmitters should check media for viruses before submitting it to IRS/MCC.

Sec. 6. Transmitter "T" Record - General Field Descriptions

.01 The Transmitter "T" Record identifies the entity transmitting the magnetic media/electronic file and contains information which is supplied on the Form 4804, Transmittal of Information Returns Magnetically/Electronically. The "T" Record has been created to facilitate current magnetic/ electronic processing of information returns at IRS/MCC with an eventual goal of paperless filing.

.02 The Transmitter "T" Record is the first record on each file and is followed by a Payer "A" Record. See Part A, Sec. 17, Definition of Terms for the definition of file. A file will be returned to the transmitter for replacement if the "T" Record is not present. For transmitters with multiple diskettes, refer to Sec. 5. 5 ¼ -inch and 3 ½- inch Diskette Specifications.

.03 The Transmitter "T" Record requires the total number of Payees ("B" Records) being reported. No money or payment amounts are reported in the Transmitter "T" Record.

.04 For all fields marked "**Required**", the transmitter must provide the information described under Description and Remarks. For those fields not marked "**Required**", a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field positions and for the indicated length.

.05 All records must be a fixed length of 750 positions.

.06 The Transmitter "T" Record must be followed by the Payer "A" Record, which must be followed with Payee "B" Records; however, the initial record on each file must be a Transmitter "T" Record.

.07 All alpha characters entered in the "T" Record must be upper-case.

.08 When transmitting information on magnetic media or electronically, the Transmitter "T" Record must precede the first Payer "A" Record and reflect the person actually transmitting the information to IRS/MCC.

Record Name: Transmitter "T" Record			
Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	Required. Enter "T."
2-5	Payment Year	4	Required. Enter "1998" (unless reporting prior year data; see field position 6).

Sec. 8. Payer "A" Record - General Field Descriptions

.01 The Payer "A" Record identifies the institution or person making payments, a recipient of mortgage interest payments, a broker, a person reporting a real estate transaction, a barter exchange, a creditor, a trustee, or issuer of an IRA, SEP, or SIMPLE, or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned. The payer will be held responsible for the completeness, accuracy, and timely submission of magnetic media files. The Payer "A" Record also provides parameters for the succeeding Payee "B" Records. IRS computer programs rely on the absolute relationship between the parameters and data fields in the "A" Record and the data fields in the "B" Records to which they apply.

.02 The number of "A" Records depends on the number of payers and the different types of returns being reported. The payment amounts for one payer and for one type of return should be consolidated under one "A" Record if submitted on the same file.

.03 Do not submit separate “A” Records for each payment amount being reported. For example, if a payer is filing Form 1099-DIV to report Amount Codes 1, 2, and 3, all three amount codes should be reported under one “A” Record, not three separate “A” Records. For “B” Records that do not contain payment amounts for all three amount codes, enter zeros for those which have no payment to be reported.

.04 The second record on the file must be an “A” Record. A transmitter may include “B” Records for more than one payer on a tape or diskette. However, **each group** of “B” Records must be preceded by an “A” Record and followed by an End of Payer “C” Record. A single tape or diskette may contain different types of returns but the types of returns **must not** be intermingled. A separate “A” Record is required for each payer and each type of return being reported.

.05 All records must be a fixed length of 750 positions.

.06 An “A” Record may be blocked with “B” Records; however, the initial record on a file must be a “T” Record followed by an “A” Record. IRS/MCC will accept an “A” Record after a “C” Record.

.07 Do not begin any record at the end of a block or diskette and continue the same record into the next block or diskette.

.08 All alpha characters entered in the “A” Record must be upper-case.

.09 When filing Form 1098, Mortgage Interest Statement, and Form 1098-E, Student Loan Interest Statement, the “A” Record will reflect the name of the recipient of the interest referred to as the payer in these instructions. The “B” Record will reflect the individual paying the interest (borrower/payer of record) and the amount paid.

.10 For all fields marked “Required”, the transmitter must provide the information described under Description and Remarks. For those fields not marked “**Required**”, a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated media position(s) and for the indicated length.

Record Name: Payer “A” Record

Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	Required. Enter “A.”
2–5	Payment Year	4	Required. Enter “1998” (unless reporting prior year data).
6–11	Blank	6	Enter blanks.
12–20	Payer’s Taxpayer Identification Number (TIN)	9	Required. Must be the valid nine-digit Taxpayer Identification Number assigned to the payer. Do not enter blanks, hyphens, or alpha characters. All zeros, ones, twos, etc., will have the effect of an incorrect TIN.

☛ **Note: For foreign entities that are not required to have a TIN, this field must be blank. However, the Foreign Entity Indicator, position 52 of the “A” Record, must be set to “1” (one).**

21–24	Payer Name Control	4	The Payer Name Control can be obtained only from the mail label on the Package 1099 that is mailed to most payers each December. To distinguish between Package 1099 and the Magnetic Media Reporting (MMR) Package, the Package 1099 contains instructions for paper filing only, and the mail label on the package contains a four (4) character name control. The MMR Package contains instructions for filing magnetically or electronically. The mail label does not contain a name control. Names of less than four (4) characters should be left-justified, filling the unused positions with blanks. If a Package 1099 has not been received or the Payer Name Control is unknown, this field must be blank filled.
25	Last Filing Indicator	1	Enter a “1” (one) if this is the last year the payer will file; otherwise, enter blank. Use this indicator if the payer will not be filing information returns under this payer name and TIN in the future either magnetically, electronically, or on paper.
26	Combined Federal/State Filer	1	Required for the Combined Federal/State Filing Program. Enter “1” (one) if participating in the Combined Federal/State Filing Program; otherwise, enter blank. Refer to Part A, Sec. 16, for further information. The only forms that may be filed under the

Generally, for each amount code entered in this field, a corresponding payment amount must appear in the Payee “B” Record.</p> <p>In most cases, the box numbers on paper information returns correspond with the amount codes used to file magnetically/electronically. However, if discrepancies occur, this revenue procedure governs.</p> <p>The Amount Codes have been expanded from nine to twelve codes to accommodate three additional payment fields in the Payee “B” Record. Amount Codes 1 through 9 will remain numeric. Amount Codes 10, 11, and 12 will be A, B, and C, respectively.</p>																																								

Example of Amount Codes:

If position 27 of the Payer "A" Record is "A" (for 1099-MISC) and positions 28-39 are "1247ACbbbbbb", this indicates the payer is reporting any or all six payment amounts (1247AC) in all of the following "B" Records. (**In this example, "b" denotes blanks in the designated positions. Do not enter the letter "b".**)

- The first payment amount field (1)** will represent rents;
- the second payment amount field (2)** will represent royalties;
- the third payment amount field (3)** will be all "0" (zeros);
- the fourth payment amount field (4)** will represent Federal income tax withheld;
- the fifth and sixth payment amount fields (5 and 6)** will be all "0" (zeros);
- the seventh payment amount field (7)** will represent nonemployee compensation;
- the eighth and ninth payment amount fields (8 and 9)** will be all "0" (zeros);

the tenth payment amount field (A) will represent crop insurance proceeds;

the eleventh payment amount field (B) will be all “0” (zeros);

Sec. 10. Payee “B” Record - General Field Descriptions and Record Layouts

.01 The “B” Record contains the payment information from the information returns. When filing information returns, the format for the “B” Records will remain constant and is a fixed length of 750 positions. The record layout for field positions 1 through 543 is the same for all types of returns. Field positions 544 through 750 vary for each type of return to accommodate special fields for individual forms. In the “A” Record, the amount codes that appear in field positions 28 through 39 will be left-justified and filled with blanks. In the “B” Record, the filer **must** allow for all twelve Payment Amount Fields. For those fields not used, enter “0s” (zeros). For example, a payer reporting on Form 1099–MISC should enter “A” in field position 27 of the “A” Record, Type of Return. If re-

porting payments for Amount Codes 1, 2, 4, 7, A and C, the payer would report field positions 28 through 39 of the “A” Record as “1247ACbbbbbb.” (In this example, “b” denotes blanks. Do not enter the letter “b”.) In the “B” Record:

- Positions 55 through 66 for Payment Amount 1** will represent rents.
- Positions 67–78 for Payment Amount 2** will represent royalties.
- Positions 79–90 for Payment Amount 3** will be “0’s” (zeros).
- Positions 91–102 for Payment Amount 4** will represent Federal income tax withheld.
- Positions 103–126 for Payment Amounts 5 and 6** will be “0’s” (zeros).
- Positions 127–138 for Payment Amount 7** will represent nonemployee compensation.
- Positions 139–162 for Payment Amounts 8 and 9** will be “0’s” (zeros).
- Positions 163–174 for Payment Amount A** will represent crop insurance proceeds.
- Positions 175–186 for Payment Amount B** will be “0’s” (zeros).
- Positions 187–198 for Payment Amount C** will represent gross proceeds paid to an attorney in connection with legal services.

.02 The following specifications include a field in the payee records called “Name Control” in which the first four characters of the payee’s surname are to be entered by the filer.

- (a) If filers are unable to determine the first four characters of the surname, the Name Control Field may be left blank. Compliance with the following will facilitate IRS computer programs in identifying the correct name control:
 - (1) The surname of the payee whose TIN is shown in the “B” Record should always appear first. If, however, the records have been developed using the first name first, the filer must leave a blank space between the first and last names.
 - (2) In the case of multiple payees, only the surname of the payee whose TIN (SSN, EIN, ITIN, or ATIN) is shown in the “B” Record must be present in the First Payee Name Line. Surnames of any other payees may be entered in the Second Payee Name Line.

.03 See Part A, Sec. 14 for further information concerning Taxpayer Identification Numbers (TINs).

.04 For all fields marked “**Required**”, the transmitter must provide the information described under Description and Remarks. For those fields not marked “**Required**,” the transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field position(s) and for the indicated length.

.05 All records must be a fixed length of 750 positions.

.06 A field is also provided in these specifications for Special Data Entries. This field may be used to record information required by state or local governments, or for the personal use of the filer. IRS does not use the data provided in the Special Data Entries Field; therefore, the IRS program does not check the content or format of the data entered in this field. It is the filer’s option to use the Special Data Entry Field. This field will not affect the processing of the “B” Records.

.07 Following the Special Data Entries Field in the “B” Record, payment fields have been allocated for State Income Tax Withheld and Local Income Tax Withheld. These fields are for the convenience of the filers. The information will not be used by IRS/MCC.

.08 Those payers participating in the Combined Federal/State Filing Program must adhere to all of the specifications in Part A, Sec. 16, to participate in this program. Filers may not file Forms 1098, 1098–E, 1098–T, 1099–A, 1099–B, 1099–C, 1099–LTC, 1099–MSA, 1099–S, 5498–MSA, and W–2G under the Combined Federal/State Filing Program.

.09 All alpha characters in the “B” Record must be uppercase.

.10 Do not use decimal points (.) to indicate dollars and cents. Ten dollars must appear as 000000001000 in the payment amount field.

.11 IRS strongly encourages transmitters to review the data for accuracy before submission to prevent issuance of erroneous notices. Transmitters should be especially careful that the names, TINs, account numbers, types of income, and income amounts are correct.

.12 When reporting Form 1098, Mortgage Interest Statement and Form 1098–E, Student Loan Interest Statement, the “A” Record will reflect the name and TIN of the recipient of the interest or payment, the filer of the Forms 1098 and 1098–E (the payer). The “B” Record will reflect the individual paying the interest (borrower/payer of record) and the amount paid. For Form 1099–S, the “A” Record will reflect the person responsible for reporting the transaction (the filer of the Form 1099–S) and the “B” record will reflect the seller/transferor. When reporting Form 1098–T, Tuition Payments Statement, the “A” Record will reflect the name and TIN of the educational institution receiving tuition payments. The “B” Record will reflect the name and TIN of the student on whose behalf the tuition is being paid.

Record Name: Payee “B” Record

Field Position	Field Title	Length	Description and Remarks Field
1	Record Type	1	Required. Enter “B.”

Record Name: Payee “B” Record (Continued)

Field Position	Field Title	Length	Description and Remarks Field	
2–5	Payment Year	4	Required. Enter “1998” (unless reporting prior year data).	
6	Corrected Return Indicator (See Note)	1	Required for corrections only. Indicate a corrected return.	
			<i>Code</i>	<i>Definition</i>
			G	If this is a one-transaction correction or the first of a two-transaction correction
			C	If this is the second transaction of a two transaction correction
			Blank	If this is not a return being submitted to correct information already processed by IRS.

☛ **Note:** C, G, and non-coded records must be reported using separate Payer “A” Records. Refer to Part A, Sec. 13, for specific instructions on how to file corrected returns.

7–10	Name Control	4	If determinable, enter the first four characters of the surname of the person whose TIN is being reported in positions 12–20 of the “B” Record; otherwise, enter blanks. This usually is the payee. If the name that corresponds to the TIN is not included in the first or second payee name line and the correct name control is not provided, a backup withholding notice may be generated for the record. Surnames of less than four characters should be left-justified, filling the unused positions with blanks. Special characters and imbedded blanks should be removed. In the case of a business other than a sole proprietorship, use the first four significant characters of the business name. Disregard the word “the” when it is the first word of the name, unless there are only two words in the name. A dash (–) and an ampersand (&) are the only acceptable special characters. Surname prefixes are considered part of the surname, e.g., for Van Elm, the name control would be VANE.
------	--------------	---	--

☛ **Note:** Although extraneous words, titles, and special characters are allowed (i.e., Mr., Mrs., Dr., apostrophe [‘], or dash [–]), this information may be dropped during subsequent IRS/MCC processing.

The following examples may be helpful to filers in developing the Name Control:

11	Type of TIN	1	This field is used to identify the Taxpayer Identification Number (TIN) in positions 12–20 as either an Employer Identification Number (EIN), a Social Security Number (SSN), an Individual Taxpayer Identification Number (ITIN) or an Adoption Taxpayer Identification Number (ATIN). Enter the appropriate code from the following table:
	Code	Type of TIN	Type of Account
	1	EIN	A business, organization, sole proprietor, or other entity
	2	SSN	An individual, including a sole proprietor
			or
	2	ITIN	An individual required to have a taxpayer identification number, but who is not eligible to obtain an SSN
			or
	2	ATIN	An adopted individual prior to the assignment of a social security number
	Blank	N/A	If the type of TIN is not determinable, enter a blank

Record Name: Payee “B” Record (Continued)

Field Position	Field Title	Length	Description and Remarks Field
12–20	Payee’s Taxpayer Identification Number (TIN)	9	Required. Enter the nine digit Taxpayer Identification Number of the payee (SSN, ITIN, ATIN, or EIN). If an identification number has been applied for but not received, enter blanks. Do not enter hyphens or alpha characters. All zeros, ones, twos, etc., will have the effect of an incorrect TIN. If the TIN is not available, enter blanks (See Note).
<p>☛ Note: IRS/MCC contacts payers who have submitted payee data with missing TINs in an attempt to prevent errors that could result in penalties. Payers who submit data with missing TINs, and have taken the required steps to obtain this information are encouraged to attach a letter of explanation to the required Form 4804. This will prevent unnecessary contact from IRS/MCC. This letter, however, will not prevent backup withholding notices (CP2100 or CP2100A Notices) or penalties for missing or incorrect TINs.</p>			
21–40	Payer’s Account Number For Payee	20	Enter any number assigned by the payer to the payee (e.g., checking or savings account number). Filers are encouraged to use this field. This number helps to distinguish individual payee records and should be unique for each document. Do not use the payee’s TIN since this will not make each record unique. This information is particularly useful when corrections are filed. This number will be provided with the backup withholding notification and may be helpful in identifying the branch or subsidiary reporting the transaction. Do not define data in this field in packed decimal format. If fewer than twenty characters are used, filers may either left or right justify, filling the remaining positions with blanks.
41–44	Payer’s Office Code	4	Enter office code of payer; otherwise, enter blanks. For payers with multiple locations, this field may be used to identify the location of the office submitting the information return.
45–54	Blank	10	Enter blanks.
	Payment Amount Fields (Must be numeric) (See Note)		Required. Filers should allow for all payment amounts. For those not used, enter zeros. For example: If position 27, Type of Return, of the “A” Record, is “A” (for 1099–MISC) and positions 28–39, Amount Codes, are “1247ACbbbbb”. This indicates the payer is reporting any or all six payment amounts in all of the following “B” Records. (In this example, “b” denotes blanks in the designated positions. Do not enter the letter “b.”) Payment Amount 1 will represent rents; Payment Amount 2 will represent royalties; Payment Amount 3 will be all “0’s” (zeros); Payment Amount 4 will represent Federal income tax withheld; Payment Amounts 5 and 6 will be all “0’s” (zeros); Payment amount 7 will represent nonemployee compensation; Payment Amounts 8 and 9 will be all “0’s” (zeros); Payment Amount A will represent crop insurance proceeds; Payment Amount B will be all “0’s” (zeros); and Payment Amount C will represent gross proceeds paid to an attorney in connection with legal services. Each payment field must contain 12 numeric characters. Each payment amount must contain U.S. dollars and cents. The right-most two positions represent cents in the payment amount fields. Do not enter dollar signs, commas, decimal points, or negative payments, except those items that reflect a loss on Form 1099–B. Positive and negative amounts are indicated by placing a “+” (plus) or “–” (minus) sign in the left-most position of the payment amount field. A negative over punch in the units position may

			be used, instead of a minus sign, to indicate a negative amount. If a plus sign, minus sign, or negative over punch is not used, the number is assumed to be positive. Negative over punch cannot be used in PC created files. Payment amounts must be right-justified and unused positions must be zero-filled. Federal income tax withheld cannot be reported as a negative amount on any form.
55–66	Payment Amount 1*	12	The amount reported in this field represents payments for Amount Code 1 in the “A” Record.
67–78	Payment Amount 2*	12	The amount reported in this field represents payments for Amount Code 2 in the “A” Record.
79–90	Payment Amount 3*	12	The amount reported in this field represents payments for Amount Code 3 in the “A” Record.
91–102	Payment Amount 4*	12	The amount reported in this field represents payments for Amount Code 4 in the “A” Record.
103–114	Payment Amount 5*	12	The amount reported in this field represents payments for Amount Code 5 in the “A” Record.
115–126	Payment Amount 6*	12	The amount reported in this field represents payments for Amount Code 6 in the “A” Record.
127–138	Payment Amount 7*	12	The amount reported in this field represents payments for Amount Code 7 in the “A” Record.
139–150	Payment Amount 8*	12	The amount reported in this field represents payments for Amount Code 8 in the “A” Record.
151–162	Payment Amount 9*	12	The amount reported in this field represents payments for Amount Code 9 in the “A” Record.
163–174	Payment Amount A*	12	The amount reported in this field represents payments for Amount Code A in the “A” Record.
175–186	Payment Amount B*	12	The amount reported in this field represents payments for Amount Code B in the “A” Record.
187–198	Payment Amount C*	12	The amount reported in this field represents payments for Amount Code C in the “A” Record.
*If there are discrepancies between the payment amount fields and the boxes on the paper forms, the instructions in this revenue procedure govern.			
199–246	Reserved	48	Enter blanks.
247	Foreign Country Indicator	1	If the address of the payee is in a foreign country, enter a “1” (one) in this field; otherwise, enter blank. When filers use this indicator, they may use a free format for the payee city, state, and

			ZIP Code. Address information must not appear in the First or Second Payee Name Line.
248–287	First Payee Name Line (See Notes)	40	Required. Enter the name of the payee (preferably surname first) whose Taxpayer Identification Number (TIN) was provided in positions 12–20 of the “B” Record. Left justify and fill unused positions with blanks. If more space is required for the name, utilize the Second Payee Name Line Field. If there are multiple payees, only the name of the payee whose TIN has been provided should be entered in this field. The names of the other payees may be entered in the Second Payee Name Line Field. If reporting information for a sole proprietor, the individual’s name must always be present, preferably on the First Payee Name Line. The use of the business name is optional in the Second Payee Name Line Field.
<p>☛ Note 1: When reporting Form 1098, Mortgage Interest Statement, and Form 1098–E, Student Loan Interest Statement, the “A” Record will reflect the name and TIN of the recipient of the interest or payment, the filer of Forms 1098 and 1098–E (the payer). The “B” Record will reflect the individual paying the interest (the borrower/payer of record) and the amount paid. For Form 1099–S, the “A” Record will reflect the person responsible for reporting the transaction (the filer of the Form 1099–S) and the “B” Record will reflect the seller/transferor. When reporting Form 1098–T, Tuition Payments Statement, the “A” Record will reflect the name and TIN of the educational institution receiving tuition payments. The “B” Record will reflect the name and TIN of the student on whose behalf the tuition is being paid.</p> <p>☛ Note 2: For Form 5498, Inherited IRAs, enter the beneficiary’s name followed by the word “beneficiary.” For example, “Brian Young as beneficiary of Joan Smith” or something similar that signifies that the IRA was once owned by Joan Smith. Filers may abbreviate the word “beneficiary” as, for example, “benef.” Refer to the 1998 “Instructions for Forms 1099, 1098, 5498, and W–2G.” The beneficiary’s TIN must be reported in positions 12–20 of the “B” Record.</p> <p>☛ Note 3: When reporting Form 1099–LTC, Long-Term Care and Accelerated Death Benefits, the Payee Name Line of the “B” Record will reflect the policyholder. The name of the insured will be reported in Field Positions 557–596 of the Payee “B” Record.</p> <p>☛ Note 4: End First Payee Name Line with a full word. Do not split words.</p>			
288–327	Second Payee Name Line	40	If there are multiple payees, (e.g., partners, joint owners, or spouses), use this field for those names not associated with the TIN provided in positions 12–20 of the “B” Record or if not enough space was provided in the First Payee Name Line, continue the name in this field (See Note). Do not enter address information. It is important that filers provide as much payee information to IRS/MCC as possible to identify the payee associated with the TIN. Left justify and fill unused positions with blanks. Fill with blanks if no entries are present for this field.
<p>☛ Note: End First Payee Name Line with a full word. Do not split words. Begin Second Payee Name Line with the next sequential word.</p>			
328–367	Blank	40	Enter blanks.
368–407	Payee Mailing Address	40	Required. Enter mailing address of payee. Street address should include number, street, apartment or suite number (or P.O. Box if mail is not delivered to street address). Left justify information and fill unused positions with blanks. This field must not contain any data other than the payee’s mailing address.

Sec. 11. End of Payer “C” Record - General Field Descriptions and Record Layout

.01 The End of Payer “C” Record is a fixed record length of 750 positions. The control total fields are each 18 positions in length.

.02 The “C” Record consists of the total number of payees and the totals of the payment amount fields filed by a given payer and/or a particular type of return. The “C” Record must be written after the last “B” Record for each type of return for a given payer. For each “A” Record and group of “B” Records on the file, there must be a corresponding “C” Record.

.03 In developing the “C” Record, for example, if a payer used Amount Codes 1, 3, and 6 in the “A” Record, the totals from the “B” Records would appear in Control Totals 1 (positions 16–33), 3 (positions 52–69), and 6 (positions 106–123) of the “C” Record. In this example, positions 34–51, 70–105, and 124–231 would be zero filled. Positions 232–748 would be blank filled.

.04 Payers/Transmitters should verify the accuracy of the totals since data with missing or incorrect “C” Records will be returned for replacement.

Sec. 12. State Totals "K" Record - General Field Descriptions and Record Layout

.01 The State Totals “K” Record is a fixed record length of 750 positions. The control total fields are each 18 positions in length.

.02 The “K” Record is a summary for a given payer and a given state in the Combined Federal/State Filing Program, used only when state reporting approval has been granted.

.03 The “K” Record will contain the total number of payees and the totals of the payment amount fields filed by a given payer for a given state. The “K” Record(s) must be written after the “C” Record for the related “A” Record.

.04 In developing the “K” Record, for example, if a payer used Amount Codes 1, 3, and 6 in the “A” Record, the totals from the “B” Records coded for this state would appear in Control Totals 1, 3, and 6 of the “K” Record.

.05 There **must** be a separate “K” Record for **each state** being reported.

.06 Refer to Part A, Sec. 16 for the requirements and conditions that **must** be met to file via this program.

Part C. Bisynchronous (Mainframe) Electronic Filing Specifications

Sec. 1. General

In compliance with Year 2000 changes, the current bisynchronous electronic filing communication package will not be offered next year.

.01 Bisynchronous electronic filing of Forms 1098, 1099, 5498, and W-2G, originals, corrections, and replacements of information returns is offered as an alternative to magnetic media (tape, tape cartridge, 8mm, 4mm, ¼ inch QIC tape cartridge or diskette) or paper filing, but is not a requirement. This method uses IBM 3780 communications protocols and is used primarily by mainframe filers. Electronic filing will fulfill the magnetic media requirements for those payers who are required to file magnetically. It may also be used by payers who are under the filing threshold requirement, but would prefer to file their information returns this way.

.02 The electronic filing of information returns is not affiliated with the Form 1040 electronic filing program. These two programs are totally independent, and filers must obtain separate approval to participate in each of them. All inquiries concerning the electronic filing of information returns should be directed to IRS/MCC. IRS/MCC personnel cannot answer questions or assist taxpayers in the filing of Form 1040 tax returns. Filers with questions of this nature will be directed to the Customer Service toll-free number **(1-800-829-1040)** for assistance.

.03 Filers participating in the electronic filing program for information returns will submit their returns to IRS/MCC electronically, and not through magnetic media or paper filing.

.04 If a request for extension is approved, transmitters who file electronically will be granted an extension of 30 days to file. Part A, Sec. 11, explains procedures for requesting extensions of time. Filers are encouraged to file their data as soon as possible.

.05 The formats of the "T", "A", "B", "C", "K", and "F" Records are the same for electronically filed records as they are for 5 ¼- and 3 ½-inch diskettes, tapes, and tape cartridges. For electronically filed documents, each transmission is considered a separate file; therefore, each transmission must begin with a Transmitter "T" Record and end with an End of Transmission (EOT) "F" Record.

Sec. 2. Electronic Filing Approval Procedure

.01 Filers must obtain, or already have, a Transmitter Control Code (TCC) assigned to them prior to submitting their files electronically. (Filers who currently have a TCC for magnetic filing do not have to request a second TCC for electronic filing.) Refer to Part A, Sec. 7, for information on how to obtain a TCC.

.02 Filers using bisynchronous protocols must obtain an IRS/MCC-assigned password prior to submitting test or actual data files. To obtain a password, the following steps must be taken:

(a) Bisynchronous filers who already have a TCC must submit either Form 4419 or a letter to indicate that they wish to file information returns electronically. Another TCC will not be assigned. If a letter is submitted, it must contain the following:

1) Name and address of transmitter.

2) Transmitter Control Code.

3) Name and phone number of a contact person within the filer's organization to whom a password will be assigned.

(b) Within 30 days of receiving the application or letter, IRS/MCC will send Form 6086, Time Sharing Operation (TSO) Password Assignment, to the filer which will contain the password to be used for electronic submissions.

(c) Upon receipt of Form 6086, the user (person who will actually transmit the data) will separate the acknowledgment from the password. Both the user and the user's manager **must** sign the acknowledgement and mail to:

Chief, Security and Disclosure Branch
IRS, Martinsburg Computing Center
P. O. Box 1208, MS-370
Martinsburg, WV 25402

(d) The users or filers should retain a copy of the signed acknowledgment for their records. It is the filer's responsibility to ensure that the password is not compromised. Access to IRS/MCC computers will not be allowed without a valid password. After a password is received and the acknowledgment returned, the filer may submit a data file.

(e) If filers have any questions relating to the security procedures, and/or they need to report their password has been compromised, they must contact IRS/MCC as soon as possible at:

IRS/MCC
Information Returns Branch
P. O. Box 1359
Martinsburg, WV 25402-1359

or by calling: **304-263-8700.**

.03 It is the user's responsibility to remember the password and not allow the password to be compromised.

Sec. 3. Test Files

.01 Filers are not required to submit a test file; however, the submission of a test file is encouraged for first time electronic filers in order to resolve any data or communication problems prior to the filing season. If filers wish to submit an electronic test file for Tax Year 1998 (returns to be filed in 1999), it **must** be submitted to IRS/MCC **no earlier than** November 1, 1998, and no later than December 15, 1998.

.02 If a filer encounters problems while transmitting electronic test files, contact IRS/MCC for assistance.

.03 A password must be obtained before submitting an electronic test file.

.04 Bisynchronous electronic test files will be processed and filers will be notified as to the acceptability of their data within 5 workdays of the date, the data, and transmittal Form 4804 are received by IRS/MCC.

.05 A test file is required from filers who want approval for the Combined Federal/State Filing Program. See Part A, Sec. 16, for further details.

Sec. 4. Electronic Submissions

.01 Electronically filed information may be submitted to IRS/MCC 7 days a week, 24 hours a day, except for routine maintenance/backup which is performed at 4:00 a.m. Eastern Time. Technical assistance will be available Monday through Friday between 8:30 a.m. and 4:30 p.m. Eastern Time by calling **304-263-8700**.

.02 Lengthy transmissions (**100,000 or more records**) are not encouraged since the transmission may be interrupted by line noise problems. **It is advisable to break lengthy files into multiple transmissions.**

.03 The time required to transmit information returns electronically will vary depending on the modem speed, if IBM 3780 data compression is used, and if the records are blocked.

Sec. 5. Transmittal Requirements

.01 All data submitted electronically is verified by transmittal Form 4804. The transmitter must mail the signed Form 4804 the same day the transmission is made. No return is considered filed until a Form 4804 is received by IRS/MCC.

.02 Form 4804 can be ordered by calling the IRS toll free forms and publications order number **1-800-TAX-FORM (1-800-829-3676)** or it may be computer-generated. **A copy of the form is also available in the back of this publication.** The Form 4804 can be downloaded from **IRP-BBS at 304- 264-7070** or from the **Internet at <http://www.irs.ustreas.gov>**. If a filer chooses to computer-generate Form 4804, all of the information contained on the original form, including the affidavit, must also be contained on the computer-generated form.

.03 The TCC in the "T" Record must be the TCC used to transmit the file and should appear on the transmittal Form 4804.

.04 Forms 4804 may be mailed to the following addresses:

Please indicate on the envelope the following message:

Sec. 6. IBM 3780 Bisynchronous Communication Specifications

In compliance with Year 2000 changes, the current bisynchronous electronic filing communication package will not be offered next year.

.01 Transmissions using IBM 3780 bisynchronous protocols must be in EBCDIC character code. Modems must be compatible with either Bell 208B for 4800 bps transmissions, AT&T 2296A for 9600 bps transmissions, or Hayes OPTIMA 288 V.FC Smartmodem for 14400 bps transmissions. These modems are dial-up type modems using the Public Switched Telephone Network. IBM 3780 data compression is acceptable for any bisynchronous transmission. Records may be blocked up to 4096 bytes with INTER RECORD SEPARATORS.

.02 IRS/MCC will accept information returns filed electronically over switched telecommunications network circuits. **For 4800 bps, the circuit will be 304-264-7080. For 9600 bps, the circuit will be 304-264-7040. For 14400 bps, the circuit will be 304-264-7045.** These circuits are equipped for bisynchronous transmission using the IBM 3780 protocol.

.03 The 4800 bps line terminates at a Bell 208B modem. The Bell 208B modem uses phase-shift keying and eight-phase modulation to transmit binary serial data signals over the telephone line in half-duplex mode. The following options have been selected:

- Transmit Level set to -4 dBm
- Compromise Equalizer in (4-Db Slope)
- DSR off in Analog Loop Mode
- Automatic Answer
- Transmitter Internally Timed
- RS-CS Interval of 50 ms

.04 The 9600 bps line terminates at an AT&T Dataphone II 2296A modem. The AT&T 2296A modem is a full-duplex, CCITT V.32 compatible unit which operates at 9600 bps or 4800 bps (fallback). The following options have been selected:

- Receiver Responds to Remote Loopback
- Loss-of-Carrier Disconnect
- Received-Space Disconnect
- Send-Space Disconnect
- Automatic Answer
- Answer on Ring 1
- DTR Interlock
- Retrain Enable
- Internal Timing
- CTS Controlled by RTS
- 0 - 1 ms RTS to CTS Delay
- CTS Dependent on Carrier
- RR Indicates Carrier
- 9600 Trellis Coding
- 4800 bps Fallback
- 4 dB Compromise Equalization

.05 The 14400 bps line terminates at a Hayes OPTIMA 288 V.FC Smartmodem. The Hayes OPTIMA Smartmodem is a half-duplex, ITU-T (formerly CCITT) V.32 and V.32 bis compatible unit which operates at 14400 bps, 9600 bps, or 4800 bps (fallback). The following options have been selected:

- Monitor DTR signal
- Assert DSR signal after handshake negotiation, but before connect result code
- Ring control S=1

Sec. 7. Bisynchronous Electronic Filing Record Specifications

.01 For bisynchronous filing there are two additional identifier records which must be used to transmit data. These records are 750 positions in length and are the first (\$\$REQUEST) and second (\$\$ADD) records sent in an electronic transmission. The purpose of these records is to provide the password and identity of the transmitter. These records may be shorter as long as inter record separators are used. The \$\$REQUEST, \$\$ADD, and the data file should be transmitted as one file. In some cases, filers have attempted to send the \$\$REQUEST and \$\$ADD as separate files. Doing this will result in a failed transmission.

.02 With the exception of these additional records, the file format for electronic filing is the same as for magnetic media filing. The format of each of these records is as follows:

Record Name: \$\$REQUEST

Field Position	Field Title	Length	Description and Remarks
1–20	\$\$REQUEST Identifier Record	20	Enter the following characters: \$\$REQUEST ID=MSGFILE
21–750	Blank	730	Enter blanks.

Electronic Filing Identifier \$\$REQUEST RECORD - Record Layout

\$\$Request Identifier Record	Blank
1–20	21–750

.03 Upon making contact with IRS/MCC and furnishing a valid password in the \$\$ADD identifier record, a data transmission session will commence. The transmission will continue until an End of Transmission (EOT) “F” Record is received. At the end of each transmission, the following message should be received electronically by the filer: “DATA RECEIVED AT MCC” and the line will be disconnected. If this message is not received, there was a problem with the submission, and the filer should contact IRS/MCC immediately.

.04 Upon receiving a data file and transmittal Form 4804, IRS/MCC will release the data for further processing. If the data cannot be processed, the filer will be notified by either letter or telephone that the data must be retransmitted. This file name, if necessary, will be provided by IRS/MCC and is to be placed in positions 45-51 of the \$\$ADD record when the file is retransmitted.

Record Name: \$\$ADD

Field Position	Field Title	Length	Description and Remarks
1–9	\$\$ADD Identifier Record	9	Enter the following characters: \$\$ADD ID=
10–17	Password	8	Enter the password assigned by IRS/MCC. For information concerning the password, see Part C, Sec. 2.
18	Blank	1	Enter a blank.
19–26	BATCHID	8	Enter the following characters: BATCHID=
27	Quote	1	Enter a single quote (‘).
28–43	Transmitter Name	16	Enter the transmitter’s name. This name should remain consistent in all transmissions. If the transmitter’s name exceeds 16 positions, truncate the name.
44	Type of File Indicator	1	Enter the Type of File Indicator from the list below: O = Original filing T = Test File C = Correction file R = Replacement file E = Extension File

Record Name: \$\$ADD (Continued)

Field Position	Field Title	Length	Description and Remarks
45–51	Replacement File Name	7	Use this field only if this is a replacement file. Enter the replacement file name which IRS/MCC has assigned to this file. This file name will be provided to the filer in the letter notifying them that a replacement file is necessary. If contact is made by telephone, the replacement file name will be given to the filer by IRS/MCC at that time. For other than replacement files, this field will contain blanks.
52	Quote	1	Enter a single quote (').
53–750	Blank	698	Enter blanks.

Part D. Asynchronous (IRP–BBS) Electronic Filing Specifications

Sec. 1. General

.01 Asynchronous electronic filing of Forms 1098, 1099, 5498, and W–2G, originals, corrections, and replacements of information returns is offered as an alternative to magnetic media (tape, tape cartridge, or diskette) or paper filing, but is not a requirement. Electronic filing using the Information Reporting Program–Bulletin Board System (IRP–BBS) will fulfill the magnetic media requirements for those payers who are required to file magnetically. It may also be used by payers who are under the filing threshold requirement, but would prefer to file their information returns this way. If the original file was sent magnetically, but was returned for replacement, the replacement may be transmitted electronically. Also, if the original file was submitted via magnetic media, any corrections may be transmitted electronically.

.02 The electronic filing of information returns is not affiliated with the Form 1040 electronic filing program. These two programs are totally independent, and filers must obtain separate approval to participate in each of them. All inquiries concerning the electronic filing of information returns should be directed to IRS/MCC. IRS/MCC personnel cannot answer questions or assist taxpayers in the filing of Form 1040 tax returns. Filers with questions of this nature will be directed to the Customer Service toll-free number **(1-800-829-1040)** for assistance.

.03 Filers participating in the electronic filing program for information returns, will submit their returns to IRS/MCC electronically and not through magnetic media or paper filing. Files submitted in this manner must be in standard ASCII code.

.04 If a request for extension is approved, transmitters who file electronically will be granted an extension of time to file. Part A, Sec. 11, explains procedures for requesting extensions of time. Filers are encouraged to file their data as soon as possible.

.05 The formats of the “T”, “A”, “B”, “C”, “K”, and “F” Records are the same for electronically filed records as they are for 5 ¼- and 3 ½-inch diskettes, tapes, and tape cartridges and must be in standard ASCII code. For electronically filed documents, each transmission is considered a separate file; therefore, each transmission **must** begin with a Transmitter “T” Record and end with an End of Transmission (EOT) “F” Record.

Sec. 2. Electronic Filing Approval Procedure

.01 Filers must obtain, or already have, a Transmitter Control Code (TCC) assigned to them prior to submitting their files electronically. (Filers who currently have a TCC for magnetic filing do not have to request a second TCC for electronic filing.) Refer to Part A, Sec. 7, for information on how to obtain a TCC.

.02 Once a TCC is obtained, filers using IRP-BBS assign their own passwords and do not need special approval.

.03 With all passwords, it is the user's responsibility to remember the password and not allow the password to be compromised. However, if filers do forget their password, call **304-263-8700** for assistance.

☛ **Note: Passwords on the IRP-BBS are case sensitive.**

Sec. 3. Test Files

.01 Filers are not required to submit a test file; however, the submission of a test file is encouraged for first time electronic filers in order to resolve any data or communication problems prior to the filing season. If filers wish to submit an electronic test file for Tax Year 1998 (returns to be filed in 1999), it **must** be submitted to IRS/MCC **no earlier than** November 1, 1998, and **no later than** December 15, 1998.

.02 If a filer encounters problems while transmitting the electronic test files, contact IRS/MCC for assistance.

.03 Filers can verify the status of their transmitted test data by dialing the IRP-BBS. This information will be available within two workdays after their transmission is received by IRS/MCC.

.04 A test file is required from filers who want approval for the Combined Federal/State Filing Program. See Part A, Sec. 16 for further details.

Sec. 4. Electronic Submissions

.01 Electronically filed information may be submitted to IRS/MCC 24 hours a day, 7 days a week. Technical assistance will be available Monday through Friday between 8:30 a.m. and 4:30 p.m. Eastern Time by calling **304-263-8700**.

.02 Filers may submit as many documents as they choose electronically. Filers are allowed 240 minutes a day; however, more time may be requested if needed. It may be advantageous to break down large files (**files in excess of two hours of transmission time**) into several smaller files. For example, if large files contain several types of returns or payers, transmit each type of return or payer as a separate file. As a result, if only one of the files is incorrect, a replacement would be needed for only the incorrect file.

.03 Do not transmit data using IRP-BBS January 1 through January 7. This will allow time for the IRP-BBS to be updated to reflect current year changes.

.04 Data compression is encouraged when submitting information returns by way of the IRP-BBS. MCC has the ability to decompress files created using several popular software compression programs such as ARC, LHARC, and PKZIP. Software data compression can be done alone or in conjunction with V.42bis hardware compression.

The time required to transmit information returns electronically will vary depending on the modem speed and the type of data compression used, if any. However, transmissions to IRP-BBS will be significantly faster than electronic filing to the mainframe. **The time required to transmit a file can be reduced by as much as 85 percent by using software compression and hardware compression.**

The following are actual transmission rates achieved in test uploads at MCC using compressed files (PKZIP) and the XMODEM-1K protocol. The actual transmission rates will vary depending on the protocol that is used. (ZMODEM is normally the fastest protocol and XMODEM and KERMIT are the slower protocols.)

Transmission Speed in bps	500 Records	2500 Records	10000 Records
9600	1 min	4 min	16 min
19200	45 sec	2 min	9 min
38400	30 sec	1 min	4 min

.05 Files submitted to IRP-BBS must have a unique filename; therefore, the IRP-BBS will build the filename that must be used. The name will consist of the filer's TCC, submission type (T = Test, P = Production, C = Correction, and R = Replacement) and a sequence number. Filers may call the file anything they choose on their end. The sequence number will be incremented every time the filers send, or attempt to send, a file. Record the upload date, time, and filename. This information will be needed by MCC in order to identify the file if assistance is required and to complete Form 4804.

.06 Electronic filers must transmit their files by the due date of the return. If a file is bad, the filer will have 45 days to transmit the first replacement file and 30 days thereafter if additional replacements are necessary.

.07 Filers are advised not to resubmit an entire file if records were omitted from the original transmission. This will result in duplicate filing. A new file should be sent consisting of the records that had not previously been submitted.

.08 The TCC in the Transmitter "T" Record must be the TCC used to transmit the file.

Sec. 5. Transmittal Requirements

.01 The results of the electronic transmission will be posted to the (F)ile Status area of the IRP-BBS; however, no further processing will occur until the signed Form 4804 is received. The transmitter must send the signed Form 4804 the same day the electronic transmission is made. No return is considered filed until a Form 4804 is received by IRS/MCC.

.02 Form 4804 can be ordered by calling the IRS toll-free forms and publication order number **1- 800-TAX-FORM, (1-800-829-3676)**, downloaded from the **IRP-BBS at 304-264-7070**, or it may be computer-generated. It may also be obtained from the **Internet at <http://www.irs.ustreas.gov>**. A copy of the form is also available in the back of this publication. If a filer chooses to computer-generate Form 4804, all of the information contained on the original form, including the affidavit, must also be contained on the computer-generated form.

.03 The TCC used in the Transmitter "T" Record is the TCC which must appear on the transmittal Form 4804.

.04 Forms 4804 may be mailed to the following addresses:

If by Postal Service:

Sec. 6. Information Reporting Program-Bulletin Board System (IRP-BBS) Specifications

.01 The IRP-BBS is an electronic bulletin board system available to filers of information returns. In addition to filing information returns electronically, the IRP-BBS provides other capabilities. Some of the advantages of IRP-BBS are as follows:

- (1) Notification within two workdays as to the acceptability of the data transmitted.
- (2) Immediate access to the latest changes and updates that affect the Information Reporting Program at IRS/MCC (program, legislative, etc.).
- (3) Access to publications such as the Publication 1220 as soon as they are available.
- (4) Capability to communicate with IRS/MCC personnel.
- (5) Ability to retrieve information and files applicable to the IRP-BBS.

.02 The IRP-BBS is available for public use and accessible using various personal computer communications equipment; however, electronic submission of information returns is limited to holders of valid TCCs. A TCC is not needed to access those portions of the IRP-BBS that contain forms and publications or to leave questions or messages for IRS/MCC personnel.

.03 Filers using IRP-BBS can determine the acceptability of files submitted by checking the file status area of the bulletin board. These reports are not immediately available but will be available two workdays after the transmission is received by IRS/MCC.

.04 Contact the IRP-BBS by dialing **304-264-7070**. The communication software settings for IRP-BBS are:

- No parity
- Eight data bits
- One stop bit
- Full duplex

The communication software should be set up to use the fastest speed allowed by the filer's modem.

.05 Due to the large number of communication products available, it is impossible to provide specific information on a particular software package or hardware configuration. Filers should contact their software or hardware supplier for assistance.

.06 IRP-BBS software provides a menu-driven environment allowing access to different parts of IRP-BBS. Whenever possible, IRS/MCC personnel will provide assistance in resolving any communication problems with IRP-BBS.

.07 IRP-BBS can be accessed at speeds from 1200 to 28,800 bps. The speed is automatically negotiated for connection at the speed of the calling modem. The communication standards supported include Industry Standard 212A, V.22bis, V.32, V.32bis, V.34, and V.FC. Point-to-point error control is supported using the V.42 ITU-T standard or MNP 2-4. Data compression is supported using V.42bis ITU-T standard or MNP5.

Sec. 7. IRP-BBS First Logon Procedures

.01 The following information will be requested to set up the filer's user profile when logging onto the IRP-BBS for the first time.

(a) Enter the letter, that corresponds to the filer's terminal, from the following:

<A> IBM PC	 IBM w/ANSI	<C> Atari
<D> ADM-3	<E> H19/Z19/H89	<F> Televid 925
<G> TRS-80	<H> Vidtex	<I> VT-52
<J> VT-100	<CR> if none of the above	

Most PCs, clones, etc., will select the IBM PC emulation. Machines with color, CGA, EGA, or VGA should select IBM w/ANSI.

(b) Upper/lower case, line feed needed, O (zero) nulls after each <CR>, do you wish to modify this? (Most users answer no.)

Common User Problems

Problem	Probable Cause	Solution
File does not upload/download	Not starting communication when prompted by 'Awaiting Start Signal'	Start upload/download on filer's end
All files not processed	Compressing several files into one filename	Compress only one file for every filename
Replacement needed	Original data does not meet processing and/or format requirements	Replacement must be submitted within 45 days of original transmission
Cannot determine file status	Not dialing back to IRP-BBS to check the status of the file	Within 24 to 48 hours after sending a file, check under (F)ile Status for notification of of acceptability
Transfer aborts before it starts	Transfer protocol mismatch	Ensure protocols match on both the sending and receiving ends
Loss of carrier during session	Incorrect modem settings on user's end	Reference your modem manual about increasing the value of the S10 register
Unreadable screens after selecting "IBM w/ANSI"	ANSI.SYS driver not loaded in the user's PC	Select non ANSI under (Y)our settings
IRS cannot complete final processing of data	User did not mail the Form 4804	Mail completed Form 4804 the same day as the electronic transmission

Common User Problems (Continued)

Problem	Probable Cause	Solution
IRS cannot determine which file is being replaced	User did not indicate which file is being replaced	Must enter the original filename that is being replaced under the replacement option
IRS cannot determine the type of file being sent of file being sent	User incorrectly indicated T, P, C, or R for the type of file	When prompted, enter the correct type of file for the data being sent
Replacement file not returned within 45 days	User did not dial back to IRP-BBS to check status of file	Within two workdays check under (F)ile Status for notification of acceptability
Duplicate data	Transmitter sends corrections for entire file	Only submit corrections for incorrect records

Part E. Magnetic/Electronic Specifications For Extensions of Time

Sec. 1. General

.01 The specifications in Part E include the required 200-byte record format for extensions of time to file requests submitted magnetically or electronically. Also included are the instructions for the information that is to be entered in the record. **Filers are advised to read this section in its entirety to ensure proper filing.**

.02 Only filers who have been assigned a Transmitter Control Code may request an extension of time magnetically or electronically. If you meet the threshold of more than 50 payers when requesting an extension but are below the 250 documents threshold, you must still submit a Form 4419, Application for Filing Information Returns Magnetically/Electronically. Requests for extensions of time may be made for Forms 1098, 1099, 5498, W-2G, W-2, and 1042-S.

.03 For Tax Year 1998 (returns due to be filed in 1999), transmitters requesting an extension of time to file for **more than 50 payers (not payees) are required to file the extension request magnetically or electronically.** Transmitters requesting an extension of time for 10 to 50 payers (not payees) are encouraged to file the request magnetically or electronically. The request may be filed on tape, tape cartridge, 5 ¼- and 3 ½-inch diskette, or electronically.

.04 For extension requests filed on magnetic media, the transmitter must mail the completed, signed Form 8809, Request for Extension of Time To File Information Returns, in the same package as the corresponding media. For extension requests filed electronically, the transmitter must FAX the Form 8809 the same day the transmission is made.

.05 **Transmitters submitting an extension of time magnetically or electronically should not submit a list of payer names and TINs with the Form 8809 since this information is included on the magnetic or electronic file. However, Line 6 of the Form 8809 must be completed with the total number of records included on the magnetic media or electronic file.**

.06 To be considered, an extension request must be postmarked or transmitted by the due date of the returns; otherwise, the request will be denied.

.07 The extension record format is also on the IRP-BBS and can be downloaded. **See Part D for more information on how to contact the IRP-BBS.**

.08 A magnetically-filed request for an extension of time should be sent using the following addresses:

If by Postal Service: 
 IRS-Martinsburg Computing Center
 Information Reporting Program
Attn: Extension of Time Coordinator
 P. O. Box 879
 Kearneysville, WV 25430

If by truck or air freight: 
 IRS-Martinsburg Computing Center
 Information Reporting Program
Attn: Extension of Time Coordinator
 Route 9 and Needy Road
 Martinsburg, WV 25401

☛ **Note: Due to the large volume of mail received by IRS/MCC and the time factor involved in processing the Form 8809, it is imperative that the attention line be present on all envelopes or packages containing Extension of Time (EOT) requests.**

.09 Requests for extensions of time to file postmarked by the United States Postal Service on or before the due date of the returns, and delivered by United States mail to the IRS/MCC after the due date, are treated as timely under the “timely mailing as timely filing” rule. A similar rule applies to designated private delivery services (PDSs). See Part A, Sec. 10. for more information on PDSs. For requests delivered by a designated PDS, but through a non-designated service, the actual date of receipt by IRS/MCC will be used as the filing date.

.10 Transmitters who submit their extensions of time requests magnetically or electronically will receive a letter from IRS/MCC with an attached list of the payers, based on information contained in the file, specifying approval and/or denial.

.11 Do not submit tax year 1998 extensions of time to file requests on magnetic media or electronically before January 1, 1999.

.12 Filers may request an extension of time **as soon as they are aware** that an extension is necessary but not later than the due date of the return. It will take a minimum of 30 days for IRS/MCC to respond to an extension request. Under certain circumstances a request for an extension of time could be denied. In such cases, the transmitter receives a denial letter. When this denial letter is received, the transmitter has 20 days to provide the additional or necessary information and resubmit the extension request to IRS/MCC.

.13 Each piece of magnetic media **must** have an external media label containing the following information:

- (a) Transmitter name
- (b) Transmitter Control Code (TCC)
- (c) Tax year
- (d) The words “Extension of Time”
- (e) Record count

.14 A request for an extension of time to file is not automatically granted. Approval or denial is dependent on information provided on the Form 8809.

.15 If the first request for an extension of time to file was submitted magnetically or electronically, additional extension requests should be submitted in the same manner.

.16 If an additional extension of time is needed, a second Form 8809 and file may be submitted before the end of the initial extension period with a postmark reflecting the date mailed. Line 7 on the form should be checked to indicate that the original extension has been received and the additional extension is being requested.

.17 See Part A, Sec. 11, for complete information on requesting an extension of time to file information returns. If there are additional questions or concerns, contact IRS/MCC.

Sec. 2. Magnetic Tape, Tape Cartridge, 8mm, 4mm and QIC (quarter inch cartridge), 5 ¼- and 3 ½-inch Diskette and Electronic Specifications

.01 Tape specifications are as follows:

- (a) 9 track.
- (b) EBCDIC (Extended Binary Coded Decimal Interchange Code) or ASCII (American Standard Coded Information Interchange) recording mode.
- (c) 1600 or 6250 BPI.
- (d) A block must not exceed 32,600 tape positions and must be a multiple of 200.
- (e) Record length of 200 bytes.
- (f) Labeled or unlabeled tapes may be submitted.

.02 Tape cartridge specifications are as follows:

- (a) Must be IBM 3480, 3490, or AS400 compatible.
- (b) Must meet American National Standard Institute (ANSI) standards and have the following characteristics:
 - (1) Tape cartridges will be ½-inch tape contained in plastic cartridges which are approximately 4-inches by 5-inches by 1-inch in dimension.
 - (2) Magnetic tape will be chromium dioxide particle based ½-inch tape.
 - (3) Cartridges will be 18-track or 36-track parallel. Indicate on the external media label if the tape cartridge is 18- or 36-track.
 - (4) Mode will be full function.
 - (5) The data may be compressed using EDRC (Memorex) or IDRC (IBM) compression.
 - (6) Either EBCDIC or ASCII.
- (c) A block must not exceed 32,600 tape positions and must be a multiple of 200.
- (d) Record length of 200 bytes.
- (e) Labeled or unlabeled tape cartridges may be submitted.

.03 8mm, 4mm, and Quarter Inch Cartridge Specifications

- (a) In most instances, IRS/MCC can process 8mm tape cartridges that meet the following specifications:

- (1) Must meet American National Standard Institute (ANSI) standards, and have the following characteristics:
 - (a) Created from an AS400 operating system **only**.
 - (b) 8mm (.315-inch) tape cartridges will be 2¼-inch by 3¼-inch.
 - (c) The 8mm tape cartridges must meet the following specifications:

Tracks	Density	Capacity
1	20 (43245 BPI)	2.5 Gb (10Gb)
1	21 (45434 BPI)	5 Gb (20 Gb)

- (d) Mode will be full function.
 - (e) **Compressed data is not acceptable.**
 - (f) Either EBCDIC (Extended Binary Coded Decimal Interchange Code) or ASCII (American Standard Coded Information Interchange) may be used. However, IRS/MCC encourages the use of EBCDIC. This information must appear on the external media label affixed to the cartridge.
 - (g) A file may consist of more than one cartridge, however, no more than 250,000 documents may be transmitted per file or per cartridge. The filename, for example; IRSEOT, will contain a three digit extension. The extension will indicate the sequence of the cartridge, within the file 1 of 3, 2 of 3, or 3 of 3, and would appear in the header label IRSEOT.001, IRSEOT.002, and IRSEOT.003 on each cartridge of the file.
- (2) The 8mm (.315-inch) tape cartridge records defined in this revenue procedure may be blocked subject to the following:
 - (a) A block must not exceed 32,600 tape positions.
 - (b) If the use of blocked records would result in a short block, all remaining positions of the block must be filled with 9's; however, the last block of the file may be filled with 9's or truncated. Do not pad a block with blanks.
 - (c) All records, except the header and trailer labels, may be blocked or unblocked. A record may not contain any control fields or block descriptor fields which describe the length of the block or the logical records within a block. The number of logical records within a block (the blocking factor) must be constant in every block with the exception of the last block which may be shorter (see item (b) above). The block length must be evenly divisible by 200.
 - (d) Various SAVE commands have been successful, however, the **SAVE OBJECT COMMAND is not acceptable.**
 - (e) Records may not span blocks.
 - (3) For faster processing, IRS/MCC encourages transmitters to use header labeled cartridges. IRSEOT may be used as a suggested filename.
 - (4) For the purposes of this revenue procedure, the following must be used:

Tape Mark:

 - (a) Signifies the physical end of the recording on tape.
 - (b) For even parity, use BCD configuration 001111 (8421).
 - (c) May follow the header label and precede and/or follow the trailer label.
 - (5) IRS/MCC can only read one data file on a tape. A data file is a group of records which may or may not begin with a tape-mark, but must end with a trailer label. Any data beyond the trailer label cannot be read by IRS programs.
- (b) 4mm (.157-inch) cassettes are now acceptable with the following specifications:
 - (1) 4mm cassettes will be 2 ¼-inch by 3-inch.
 - (2) The tracks are 1 (one).
 - (3) The density is 19 (61000 BPI).
 - (4) The typical capacity is DDS (DAT data storage) at 1.3 Gb or 2 Gb, or DDS-2 at 4 Gb.
 - (5) The general specifications for 8mm cartridges will also apply to the 4mm cassettes.
 - (c) Various Quarter Inch Cartridges (QIC) (¼-inch) are also acceptable.
 - (1) QIC cartridges will be 4" by 6".
 - (2) QIC cartridges must meet the following specification:

Size	Tracks	Density	Capacity
QIC-11	4/5	4 (8000 BPI)	22Mb or 30Mb
QIC-24	8/9	5 (8000 BPI)	45Mb or 60Mb
QIC-120	15	15 (10000 BPI)	120Mb or 200Mb
QIC-150	18	16 (10000 BPI)	150Mb or 250Mb
QIC-320	26	17 (16000 BPI)	320Mb
QIC-525	26	17 (16000 BPI)	525Mb
QIC-1000	30	21 (36000 BPI)	1Gb
QIC-1350	30	18 (51667 BPI)	1.3Gb
QIC-2Gb	42	34 (40640 BPI)	2Gb

(3) The general specifications that apply to 8mm cartridges will also apply to QIC cartridges.

.04 Diskette specifications are as follows:

- (a) 5 ¼- or 3 ½-inches in diameter.
- (b) ASCII recording mode **only**. Additional specifications may be found in Part B, Sec. 5, of this revenue procedure.
- (c) Record length of 200 bytes.
- (d) Diskettes must be created using the MS-DOS operating system.
- (e) Filename of IRSEOT must be used. No other filenames are acceptable. If a file will consist of more than one diskette, the filename IRSEOT will contain a three-digit extension. This extension will indicate the sequence of the diskettes within the file. For example, the first diskette will be named IRSEOT.001, the second diskette will be name IRSEOT.002, etc.
- (f) Delimiter character commas (,) or quotes (“ ”) must not be used.
- (g) Positions 199 and 200 of each record have been reserved for use as carriage return/line feed (cr/lf) characters, if applicable.

.05 Bisynchronous electronic specifications include:

- (a) Transmitter must have a Transmitter Control Code (TCC) and a valid IRS/MCC-assigned password prior to submitting data files.
- (b) Access phone numbers:

4800 bps	304-264-7080
9600 bps	304-264-7040
14400 bps	304-264-7045

☞ **Note:** See Part C, Bisynchronous (Mainframe) Electronic Filing Specifications, for detailed information on filing with IRS/MCC via bisynchronous protocols.

.06 IRP-BBS specifications include:

- (a) Transmitter must have Transmitter Control Code (TCC).
- (b) IRP-BBS access phone number is **304-264-7070**.
- (c) Communications software settings are:

- (d) Access speeds from 1200 to 28,800 bps.

☞ **Note:** See Part D, IRP-BBS Electronic Filing Specifications, for detailed information on filing with IRS/MCC via IRP-BBS.

Sec. 3. Record Layout

.01 Positions 6 through 185 of the following record should contain information about the **payer** for whom the extension of time to file is being requested. Do not enter transmitter information in these fields. **Only one TCC may be present in a file.**

Record Layout for Extension of Time

Announcement 98-42

Publication 3079, *Gaming Publication for Tax-Exempt Organizations*, is now available for tax-exempt organizations conducting gaming. The publication provides general information regarding tax exemption, unrelated business tax, recordkeeping, filing requirements (income tax, withholding tax, excise, and employment tax), and provides examples of the type of records that should be maintained by tax-exempt organizations conducting bingo, pull-tabs, and other games of chance. The publication also provides information regarding related publications that contain additional information on the topics discussed in the publication.

Publication 3079 may be obtained by calling 1-800-TAX-FORM (1-800-829-3676) or through the internet at ftp.fedworld.gov/pub/irs-pdf/p3079.pdf. Additional information about tax-exempt organizations may be obtained through the Exempt Organization's Home Page at www.irs.ustreas.gov/bus_info/eo.

Foundations Status of Certain Organizations

Announcement 98-43

The following organizations have failed to establish or have been unable to maintain their status as public charities or as operating foundations. Accordingly, grantors and contributors may not, after this date, rely on previous rulings or designations in the Cumulative List of Organizations (Publication 78), or on the presumption arising from the filing of notices under section 508(b) of the Code. If an organization listed above submits information that warrants the renewal of its classification as a public charity or as a private operating foundation, the Internal Revenue Service will issue a ruling or determination letter with the revised classification as to foundation status. Grantors and contributors may thereafter rely upon such ruling or determination letter as provided in section 1.509(a)-7 of the Income Tax Regulations. It is not the practice of the Service to announce such revised classification of foundation status in the Internal Revenue Bulletin.

Announcement of the Consent Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents, and Enrolled Actuaries From Practice Before the Internal Revenue Service

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent, or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent, or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Ser-

vice matter from directly or indirectly employing, accepting assistance from, being employed by, or sharing fees with any practitioner disbarred or suspended from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents, and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Revenue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public ac-

countant, enrolled agent, or enrolled actuary, and date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletins for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent, or enrolled actuary so suspended and will be consolidated and published in the Cumulative Bulletin.

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified*, below).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it ap-

plies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1986 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the

new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified* and *superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.
